Real problems
Our solutions

Who are we?

We are Lab387 - a digital laboratory for web, design and education guided by experiences, knowledge and practice from the real, business, world.

We work as a team and test every problem until we come up with a solution that is tailored just for you - our client.

We don't deal much with the theory because only innovative solutions for our clients can bring different and better results that are recognized.

If you find it unusual and interesting, we believe that you are one of those people who want to move forward.

What do we do?

Our focus is on working with clients who have unusual and challenging problems, and whose solution we can see through some kind of innovative website or web application.

With graphic design we solve creative problems whether it is a complete branding or UX / UI design that will help us make better websites.

Education is something that has our special attention and we have selflessly passed on our knowledge to many real people who make money from the web today. We are especially proud of our Lab387 apprentice that over 20 diligent and dear people have experienced.

With whom do we work?

We love different challenges, and we mostly work with clients who are part of our team - they get involved, share their experiences and problems and work with us on their solutions. We know this is the only way to get the best results.

We do not work without a detailed analysis and agreement of both parties, we don't work without contracts and invoices, we don't work for free and without an advance. This way, we are all safe and we know that the result will be fantastic - confirmed by many years of experience.

If you think alike you should review our portfolio to check out our expertise. We have no doubt that the next email / message / call will be from you to solve your problems together.

WEB DESIGN

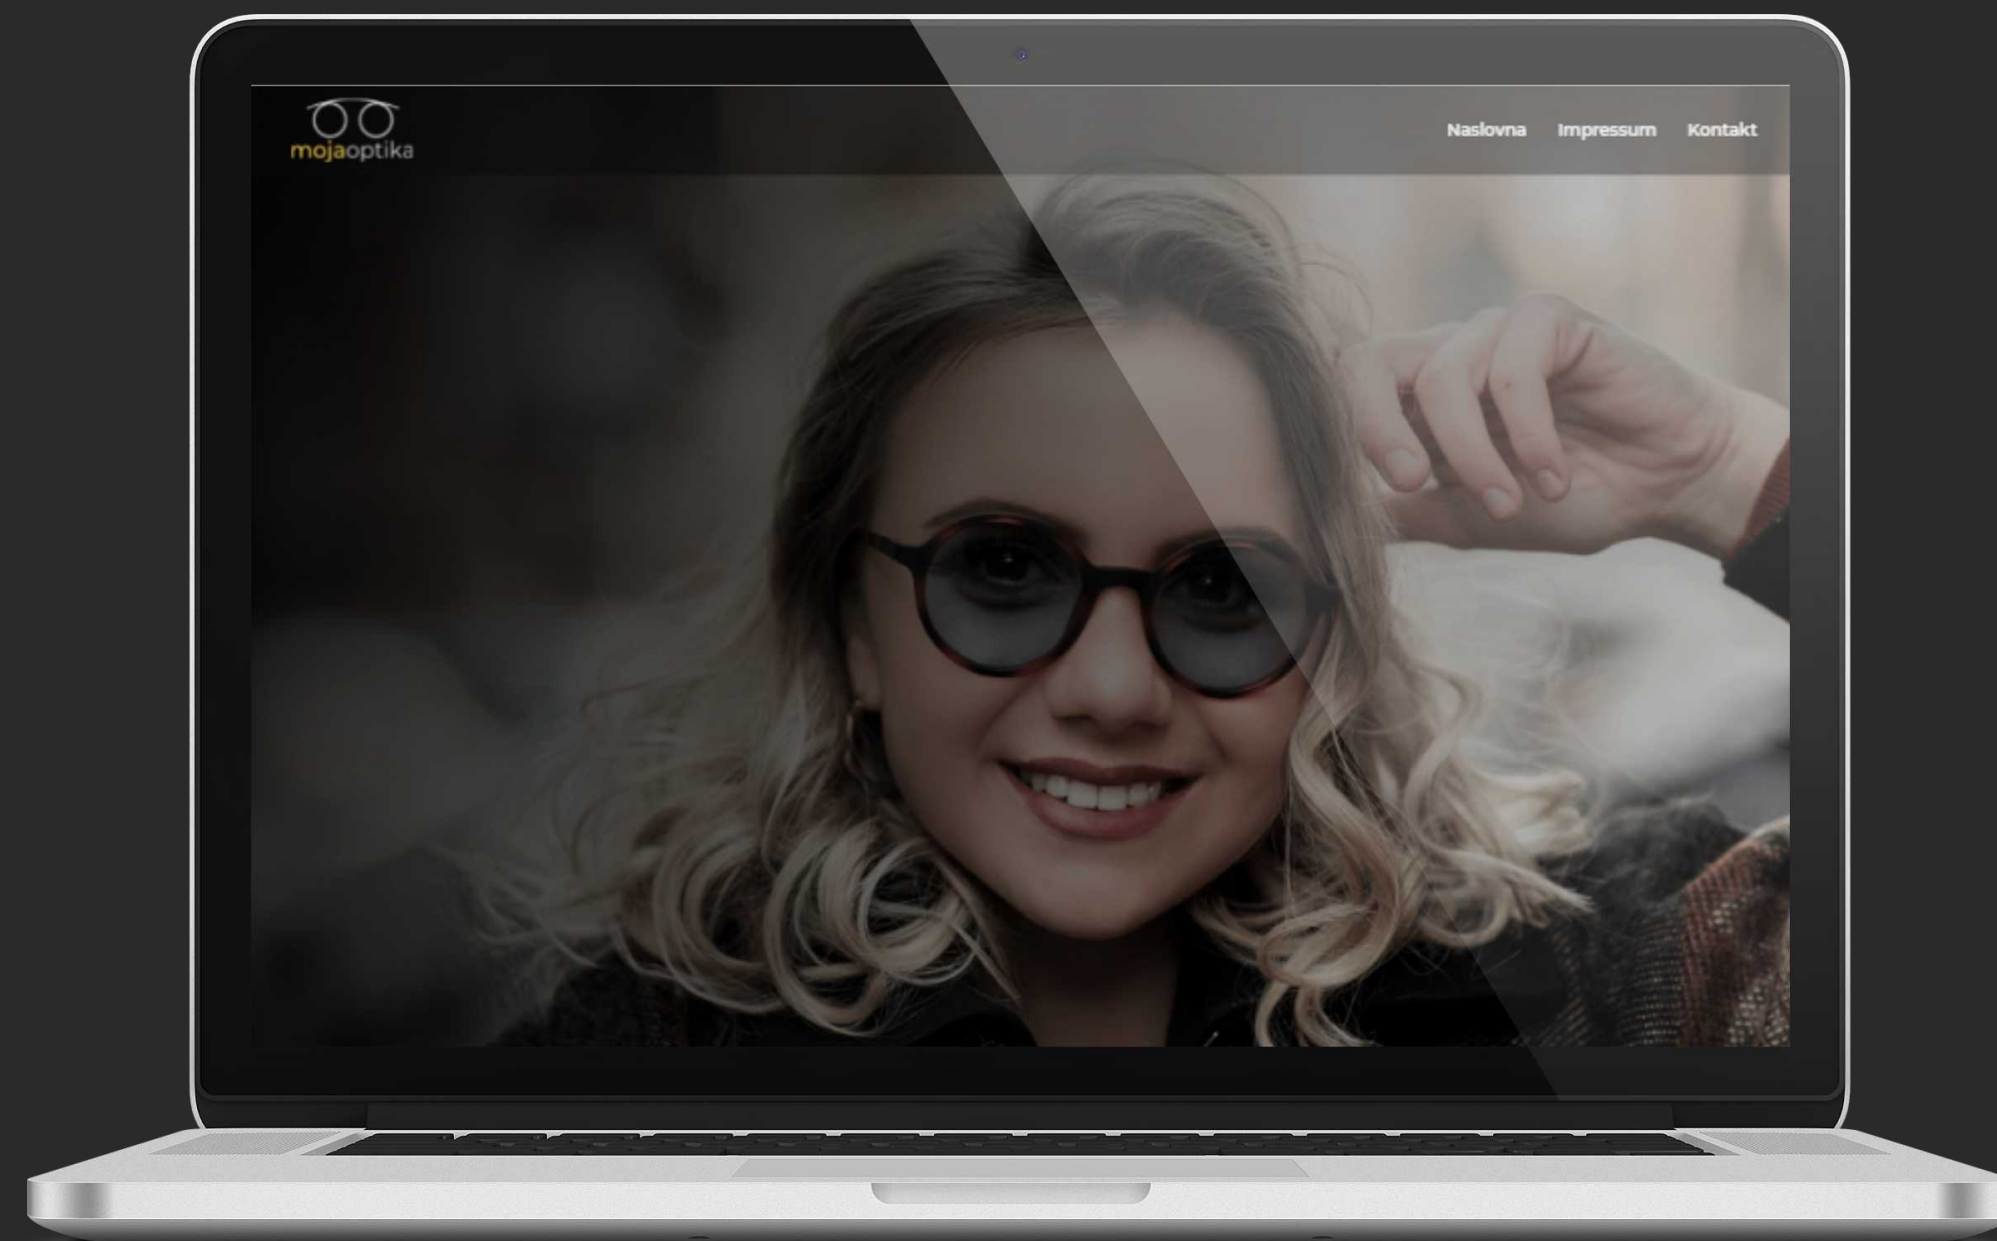

Web Design

Below this text, you can see the websites we have designed from the scratch and implemented using the [WordPress CMS](#) system. In the implementation, we solved all the problems for the client: we bought and configured hosting and domain, installed and configured the CMS, inserted the design with the content and initially set the website to be very fast and to have permanent backups and protection against various attacks. All pages are customized for display on all mobile devices.

If you are interested in technical things, we have implemented [CDN](#), [Caching](#), [Firewall](#), [2FA](#), [XSS Protection](#), [SQL Injection Protection](#), [Automatic Update](#), [Automatic Full Backup](#), [Remote Storage Backup](#), [Image Optimisation](#), [Database Optimisation](#).

For a certain number of web pages, we have programmed additional functionalities that you can check out within the descriptions of the websites.

Moja Optika

mojaoptika.ba

For this website, we carefully selected and processed photos from the photo shooting session, wrote a copy (text) and then defined and created a structure that will tell a very interesting and unusual story. At the very beginning of the website, we created one small optical illusion to make it even more interesting.

It is told through the relationship of black, white and gray tones with the crystal clear font from the logo, in order to give space to the text and the photos themselves in order to emphasize the importance of good eyesight, but also an important fashion trend.

We colored the important places for the website user yellow from the logo, and with the font size and a slightly larger negative space, we made the complete content look clean and simple.

Through various calls to action within the copy, we encouraged visitors to use the contact information at the bottom of the page.

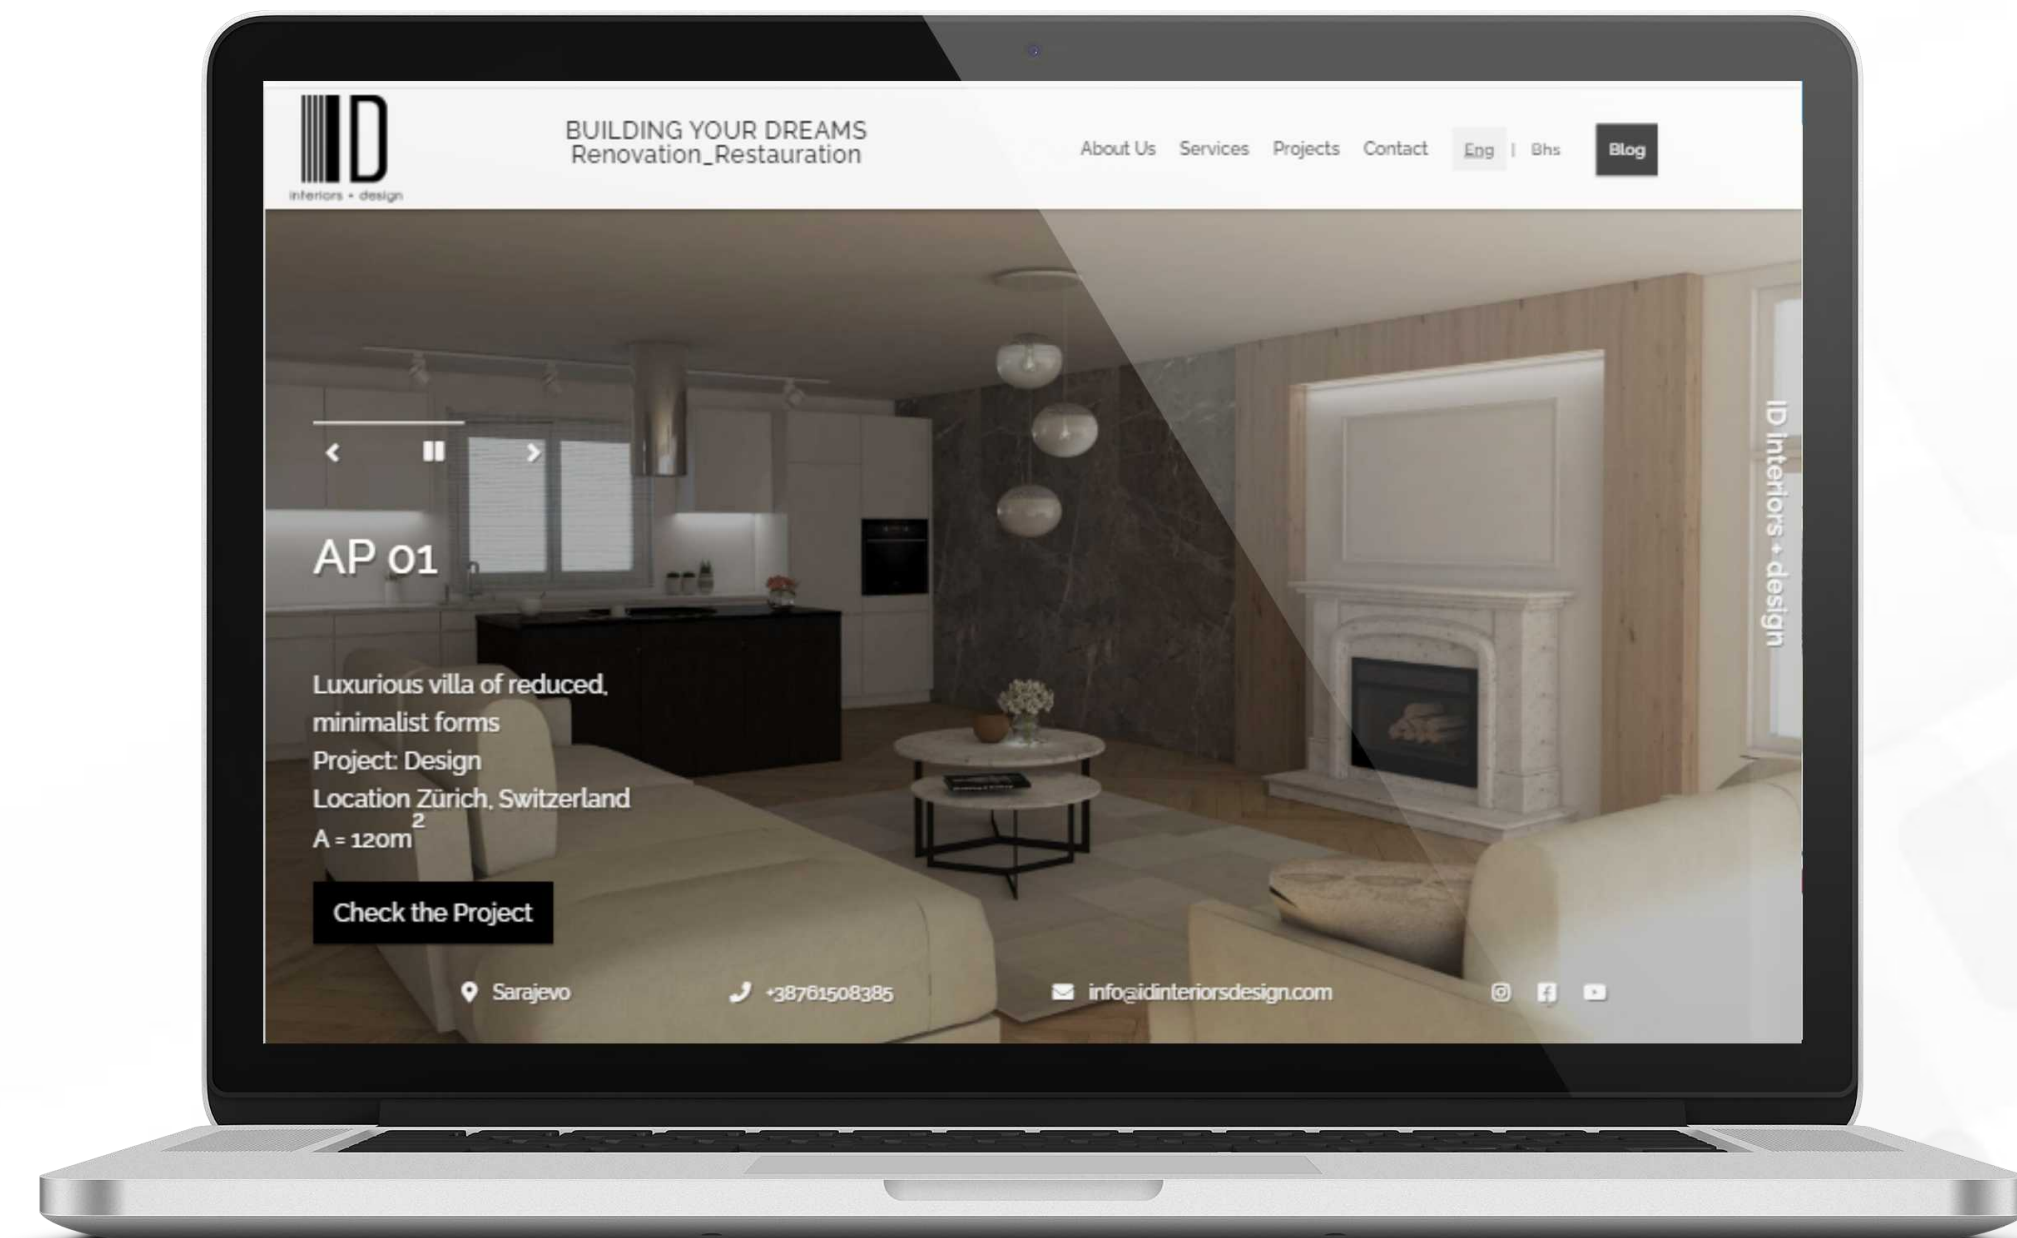

ID Interiors + Design

We have carefully created a modern and dynamic website for our client in order to best present her services and interior design and product design projects.

The base colors are white and dark gray in order to give space to the photos and 3D renders to best represent the works, and different animations and transitions have brought a little bit of exclusivity.

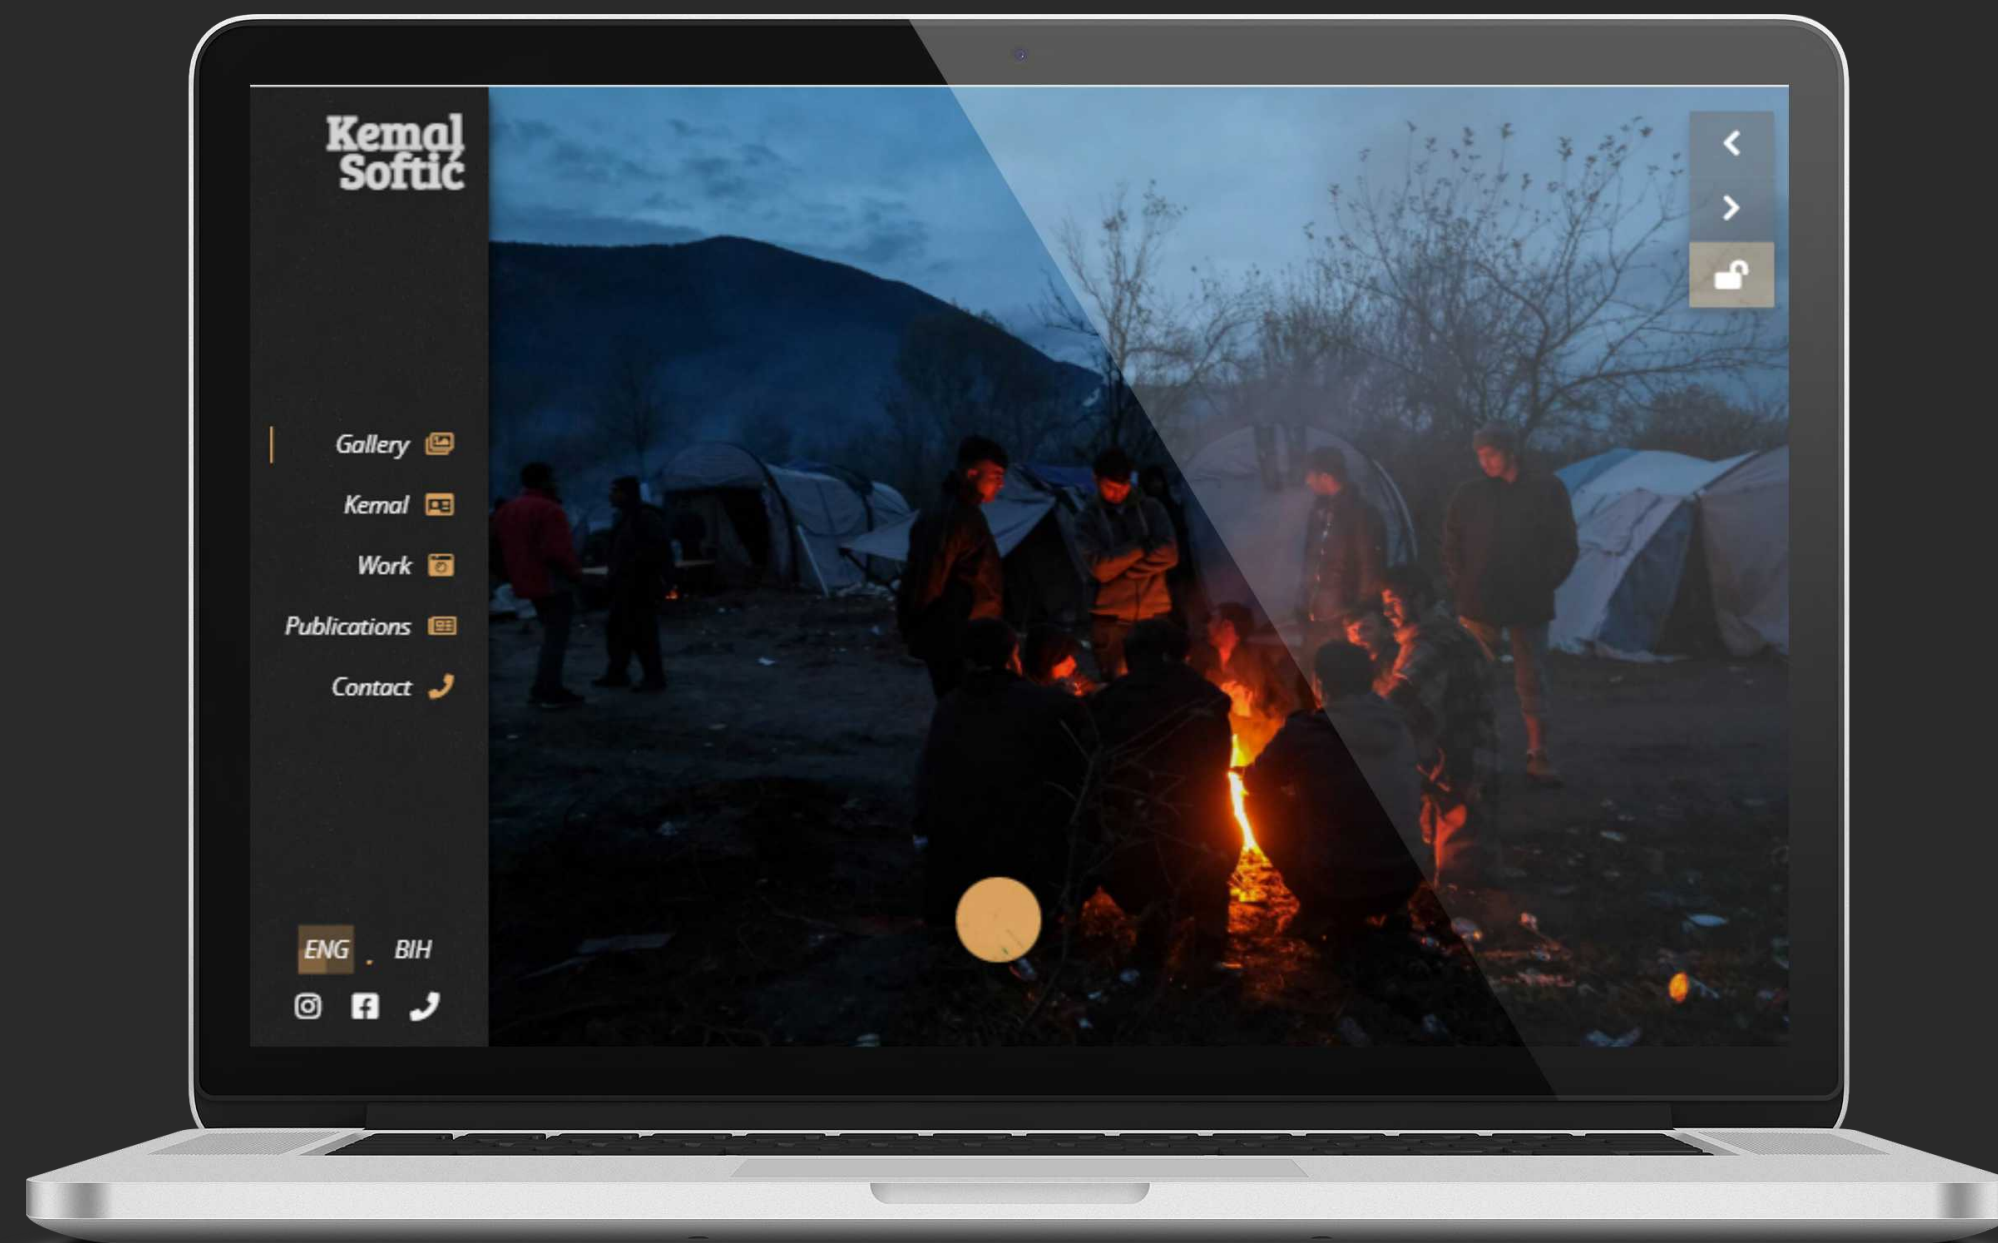

With detailed descriptions of the service package, together with the client, we created an opportunity for everyone to easily find what they need, and then to establish further contact and future cooperation using the contact form and other information.

Also, the website is designed to be multilingual.

idinteriorsdesign.com

Kemal Softić Photography

kemalsoftic.lab387.com

For a client whose work can be found in many publications, including ABC News, Associated Press and Washington Times, we have created a modern and dynamic website in order to present his work - photography.

For the base colors, we chose dark gray and white to highlight the photos and the content. With light brown color and simple animations, transitions and other effects, we marked important places and introduced dynamics and modern design.

In the end, we gave the opportunity to all site visitors to contact our client and develop new cooperation through the social networks and contact form.

We also created the page to be multilingual.

Tehnoelektronik doo

For our long-time and award-winning client, we have carefully created a corporate website with a wealth of content and additional information.

You will find all products with detailed descriptions and information as well as excellent navigation to make it easier for the user to find the perfect product.

The complete text and photo content was transferred from the Daikin price list and catalog, and then stylistically processed. While designing this website, we were guided by simplicity, therefore we have the client's blue color in important places, while white and dark gray predominate. We also chose the Daikin brand font so we would have consistency.

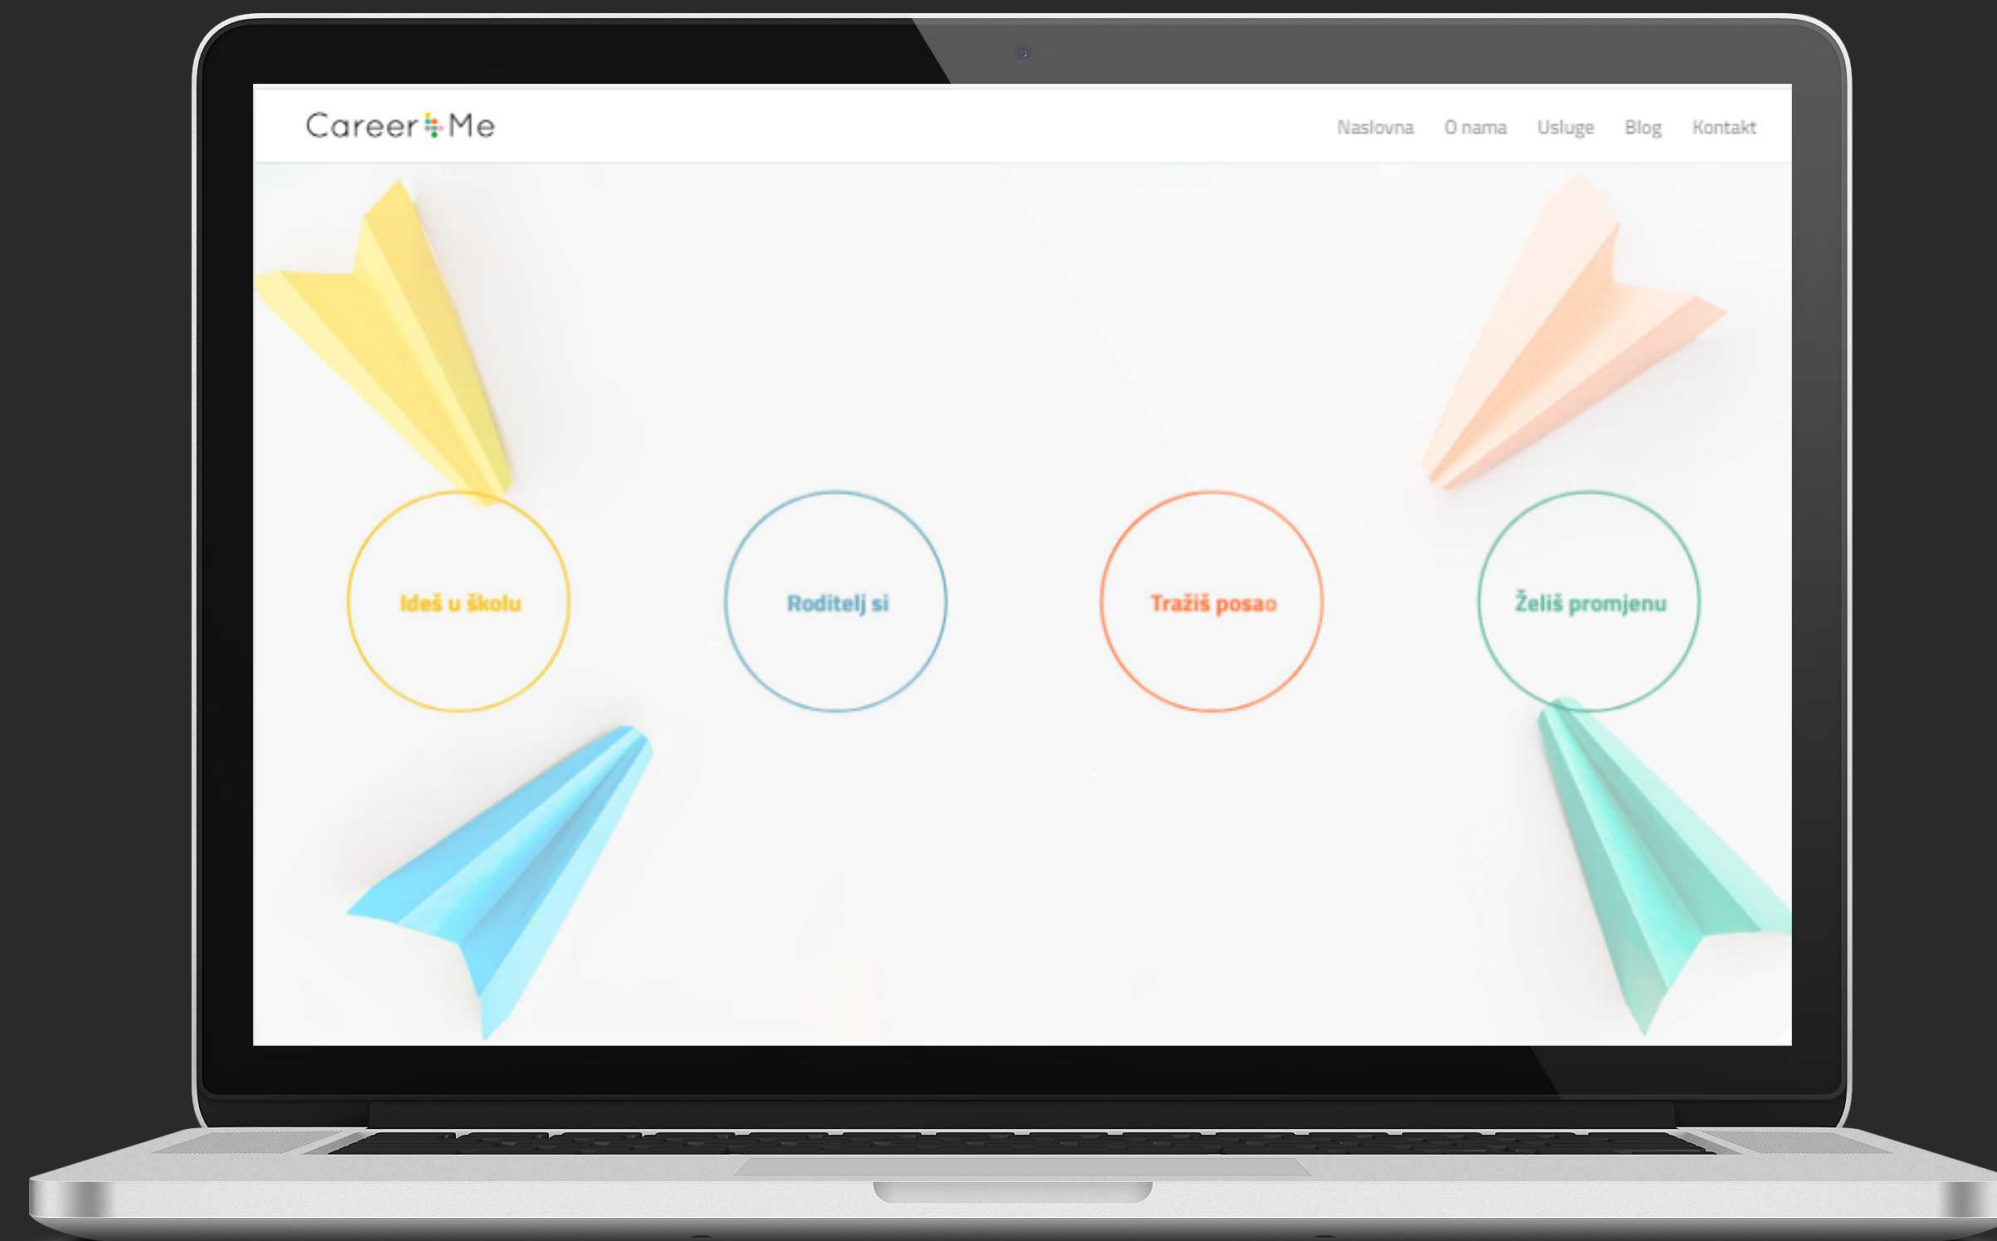

Within the website, we have included a large number of our client's important projects, in order to give visitors greater security in choosing and show the full range of possibilities of the company Tehnoelektronik d.o.o.

Through various calls to action, we encouraged website visitors to further contact with our client and achieve new, potential cooperation.

tehnoelektronik.ba

Carrer4Me

carrer4me.lab387.com

For our client, we created a one-page website with rich content that we decorated with gentle colors selected for the categories of the company's services.

The structure of the website is set up so that each of the visitors can easily select a category and find what is relevant for them.

We highlighted the content with a large font, and using animations, parallax and interactive transitions, we added the dynamics to this website.

By inviting action within each category and putting customized forms, we invited visitors to further contact, but also made it easier for our client to segment the messages from the website.

Hotel Dom Saas-Fee AG

Together with our client we have created an interactive and modern website to present new ideas and projects related to Dom Collection Group and Hotel Dom Saas-Fee AG in Switzerland.

For the basic colors, we chose dark gray and white, while we marked important places within the structure with red.

Using animations, transitions and other techniques, we introduced a dose of exclusivity, especially within the first section of the website. With a branched structure and quality textual and photo content, we provided visitors with all the necessary information about the project. For certain parts of the content, we have created limited access at the client's request.

We also provided visitors with further contact with the company using the contact form and other information.

Created within Dom Collection d.o.o.

Team:

- Šejla Bratić - Designer
- Edita Tahtović - Copywriter

dom-project.com

Du Glacier Residence

glacier-project.com

We have created a modern, sales website for our clients with a long tradition in the hotel industry.

For the basic colors we used white and dark gray, while for important places, the appropriate orange color was used.

Within the website, we have created an interactive display of the hotel sketch itself, along with all the basic information about each of the apartments, which are activated by clicking the mouse on PC devices or clicking on mobile devices.

Also, the lock of additional information has been implemented on the site so that the client can gather a list of potential buyers of apartments.

In addition, a contact form has been implemented to invite potential clients to action and further contact

- Bojan Stojčić - Designer

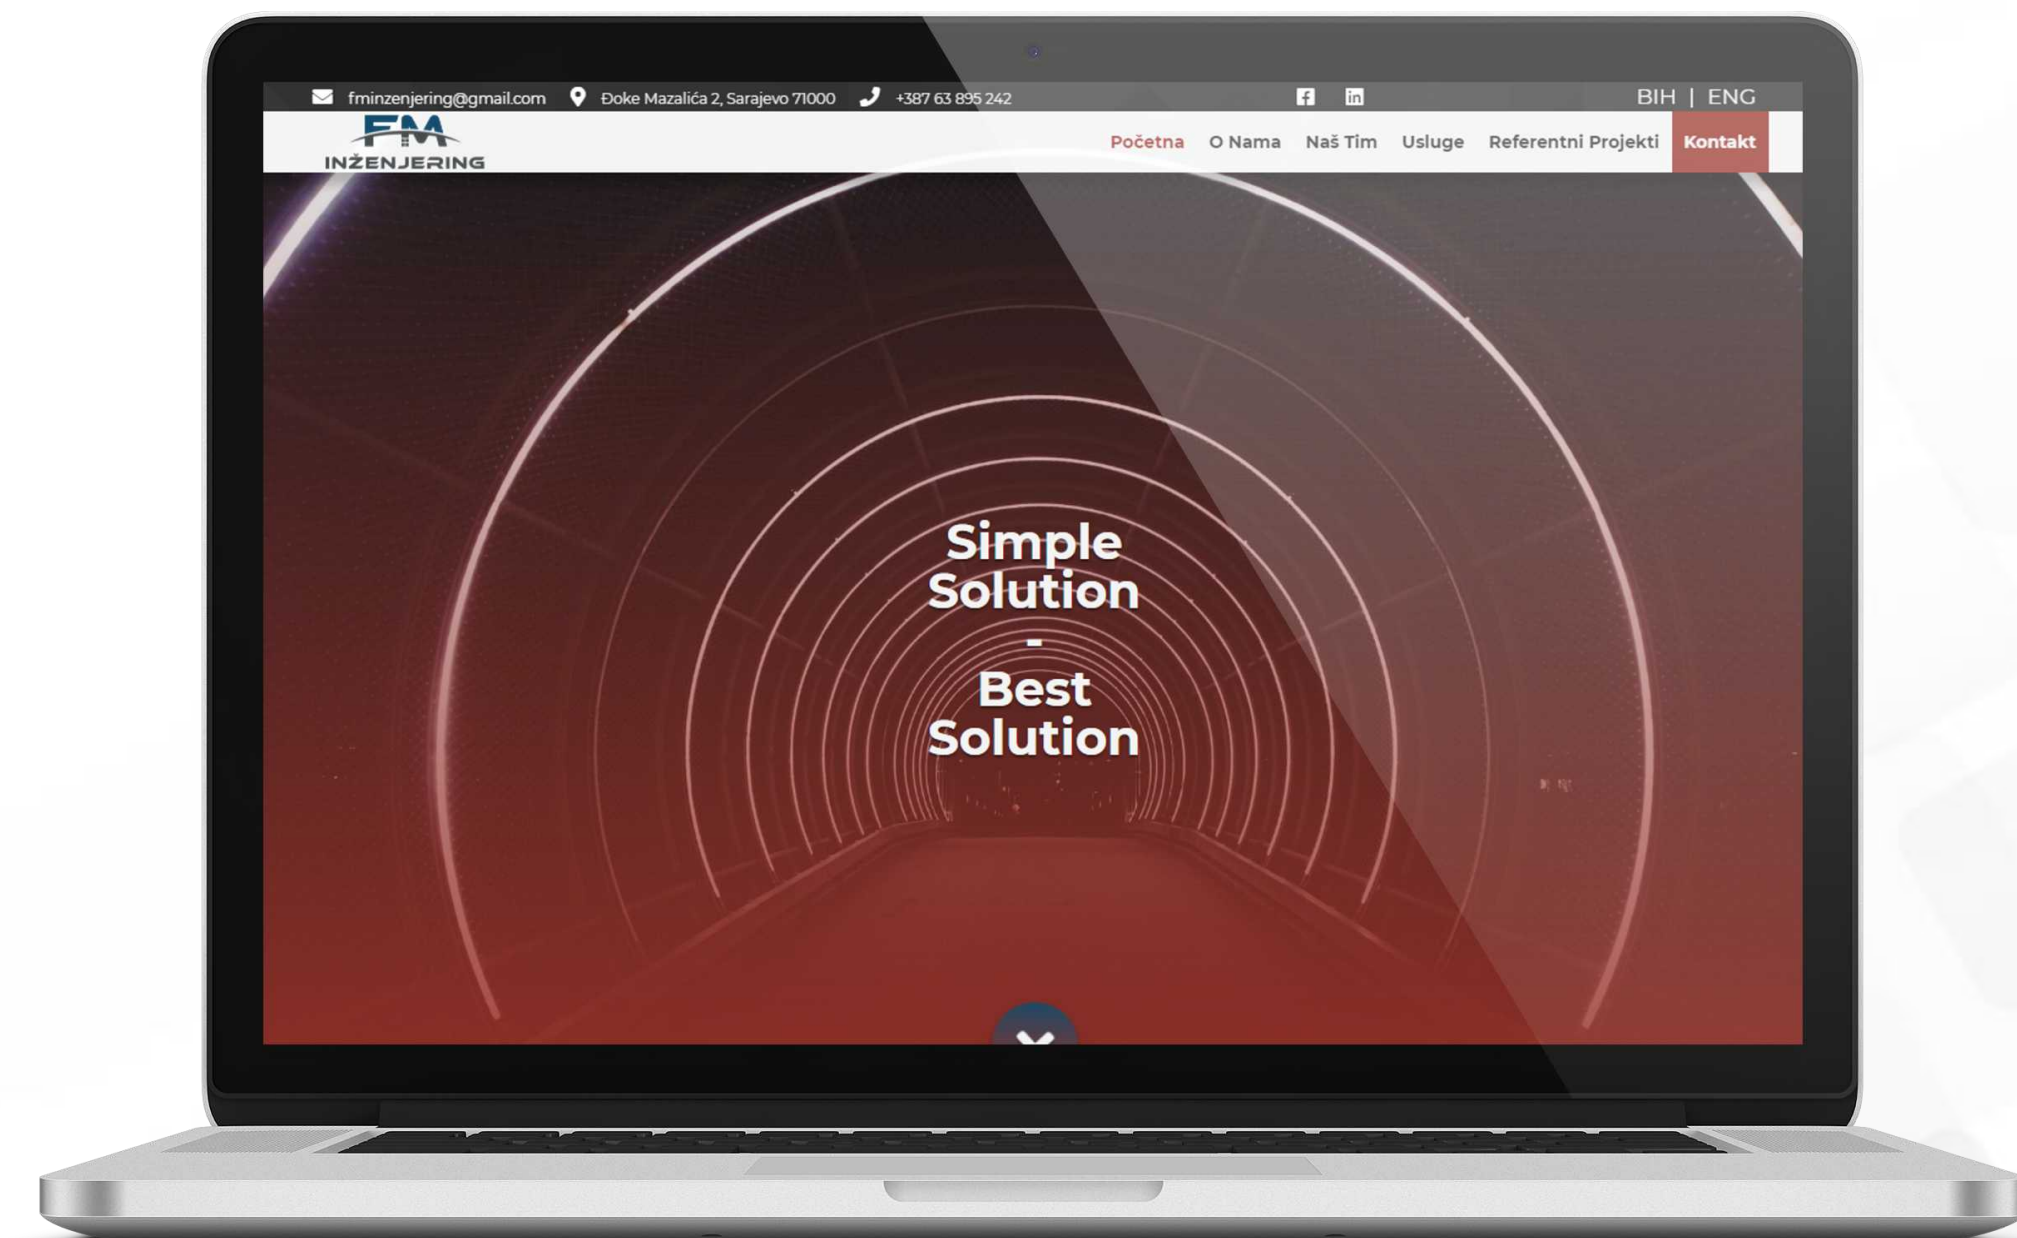

FM Inženjering

We have created a modern and simple website for our client in order to best present his projects and services in the field of engineering. In addition to the blue color from the logo, we also used the red color to create gradients that brought a modern style within the website along with simple animations and transitions.

A convenient and clean font and a very simple structure were chosen to make the content stand out.

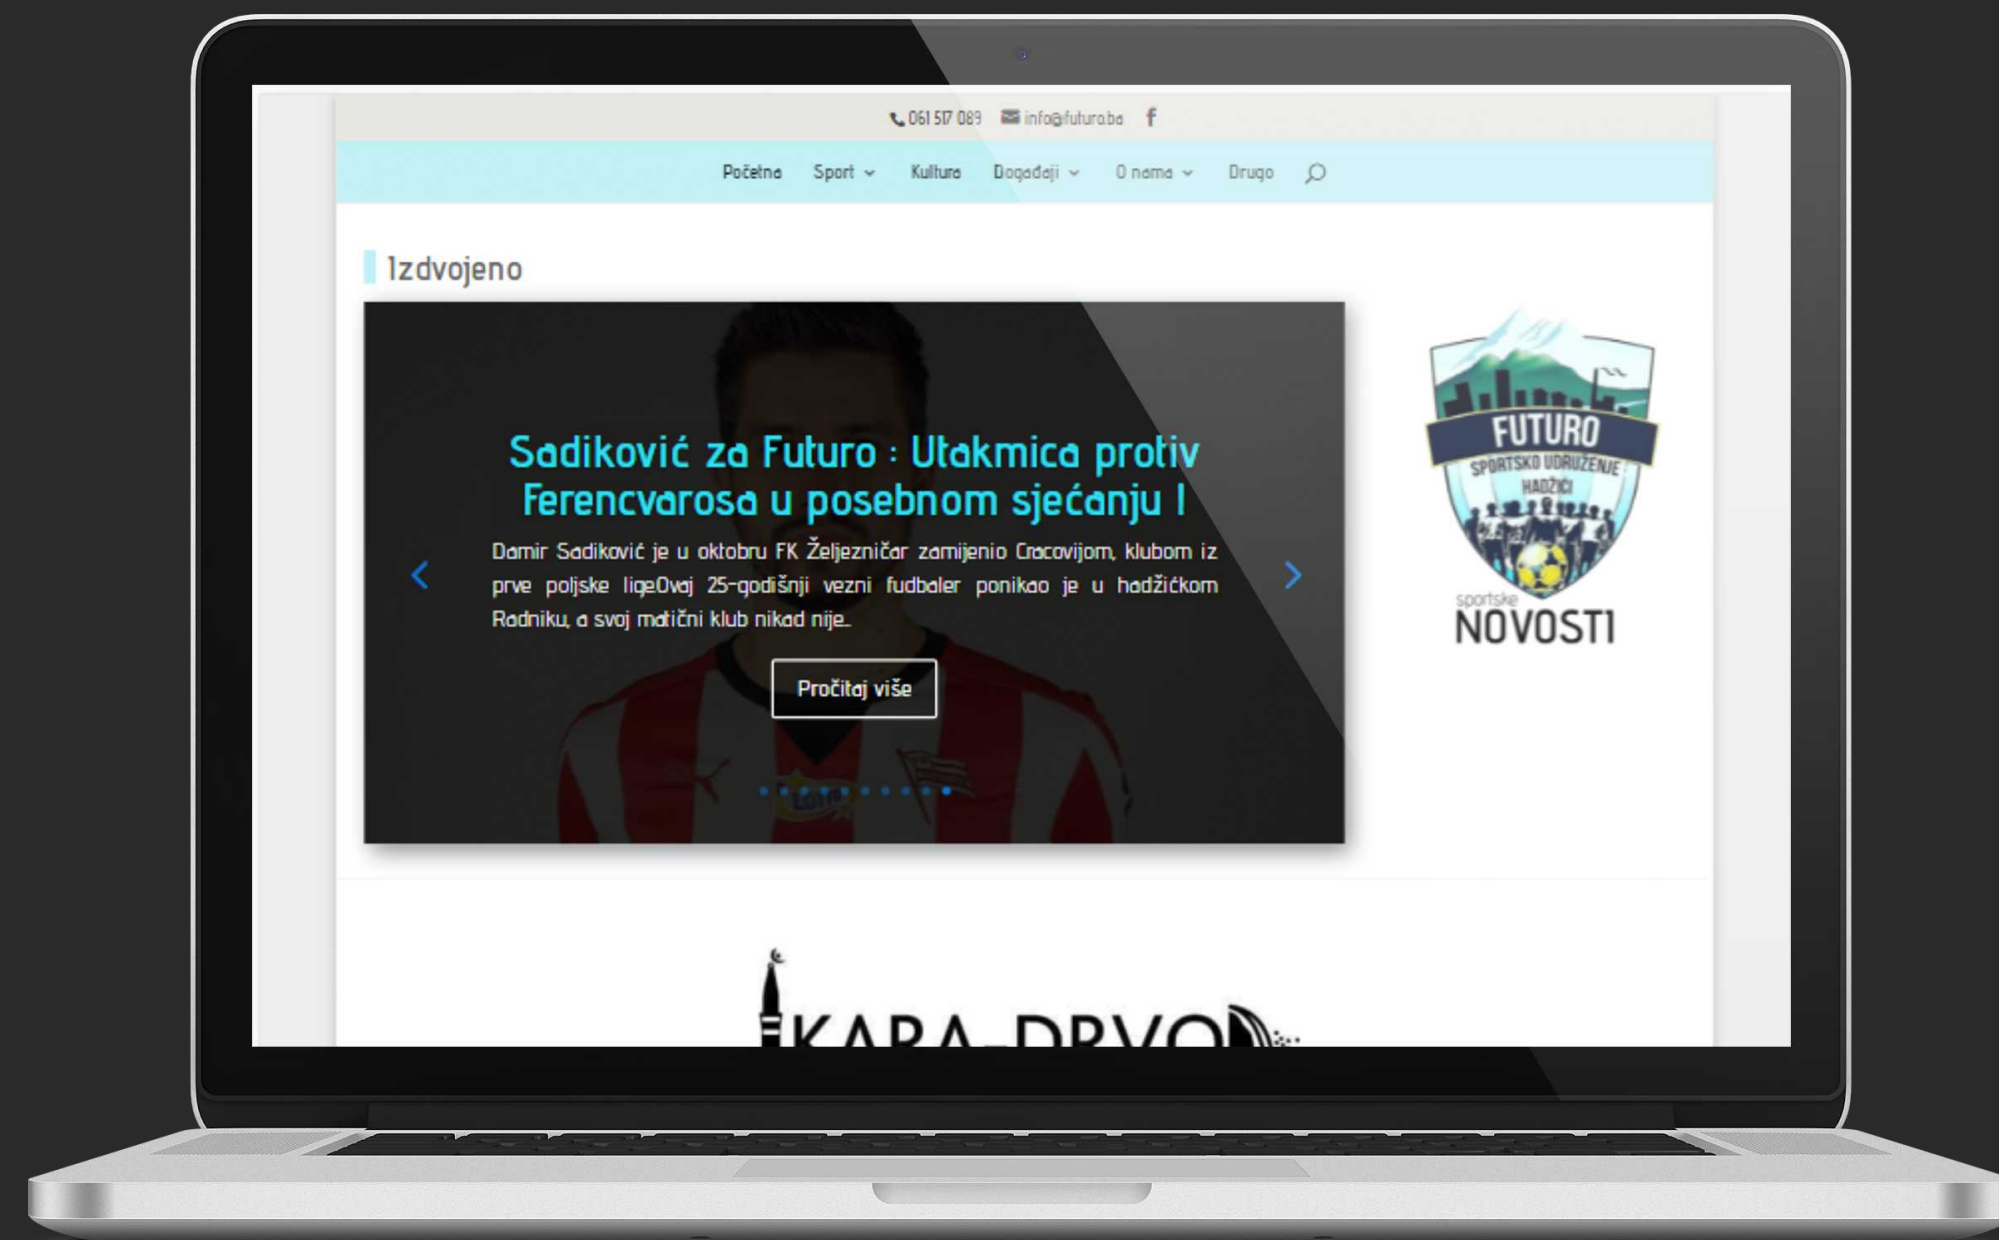

In order to gain the trust of visitors and give them a number of additional information, we created a section for reference projects where we listed all the important projects done so far with important information.

In order to facilitate the eventual contact with the client, we have placed all the important contact information at the top and bottom of the page - social networks, email and phone numbers.

fminzenjering.lab387.com

Portal Futuro

futuro.ba

For our client, the Futuro Sports Association, we have created a sports web portal together with an informative section about the association itself and its projects.

For the main colors of the page, we chose light blue as the carrier of all the essential elements, and we chose a font that completely matches the logo itself.

We have placed the sponsors in strategic places to help our client organize sports tournaments in an easier way.

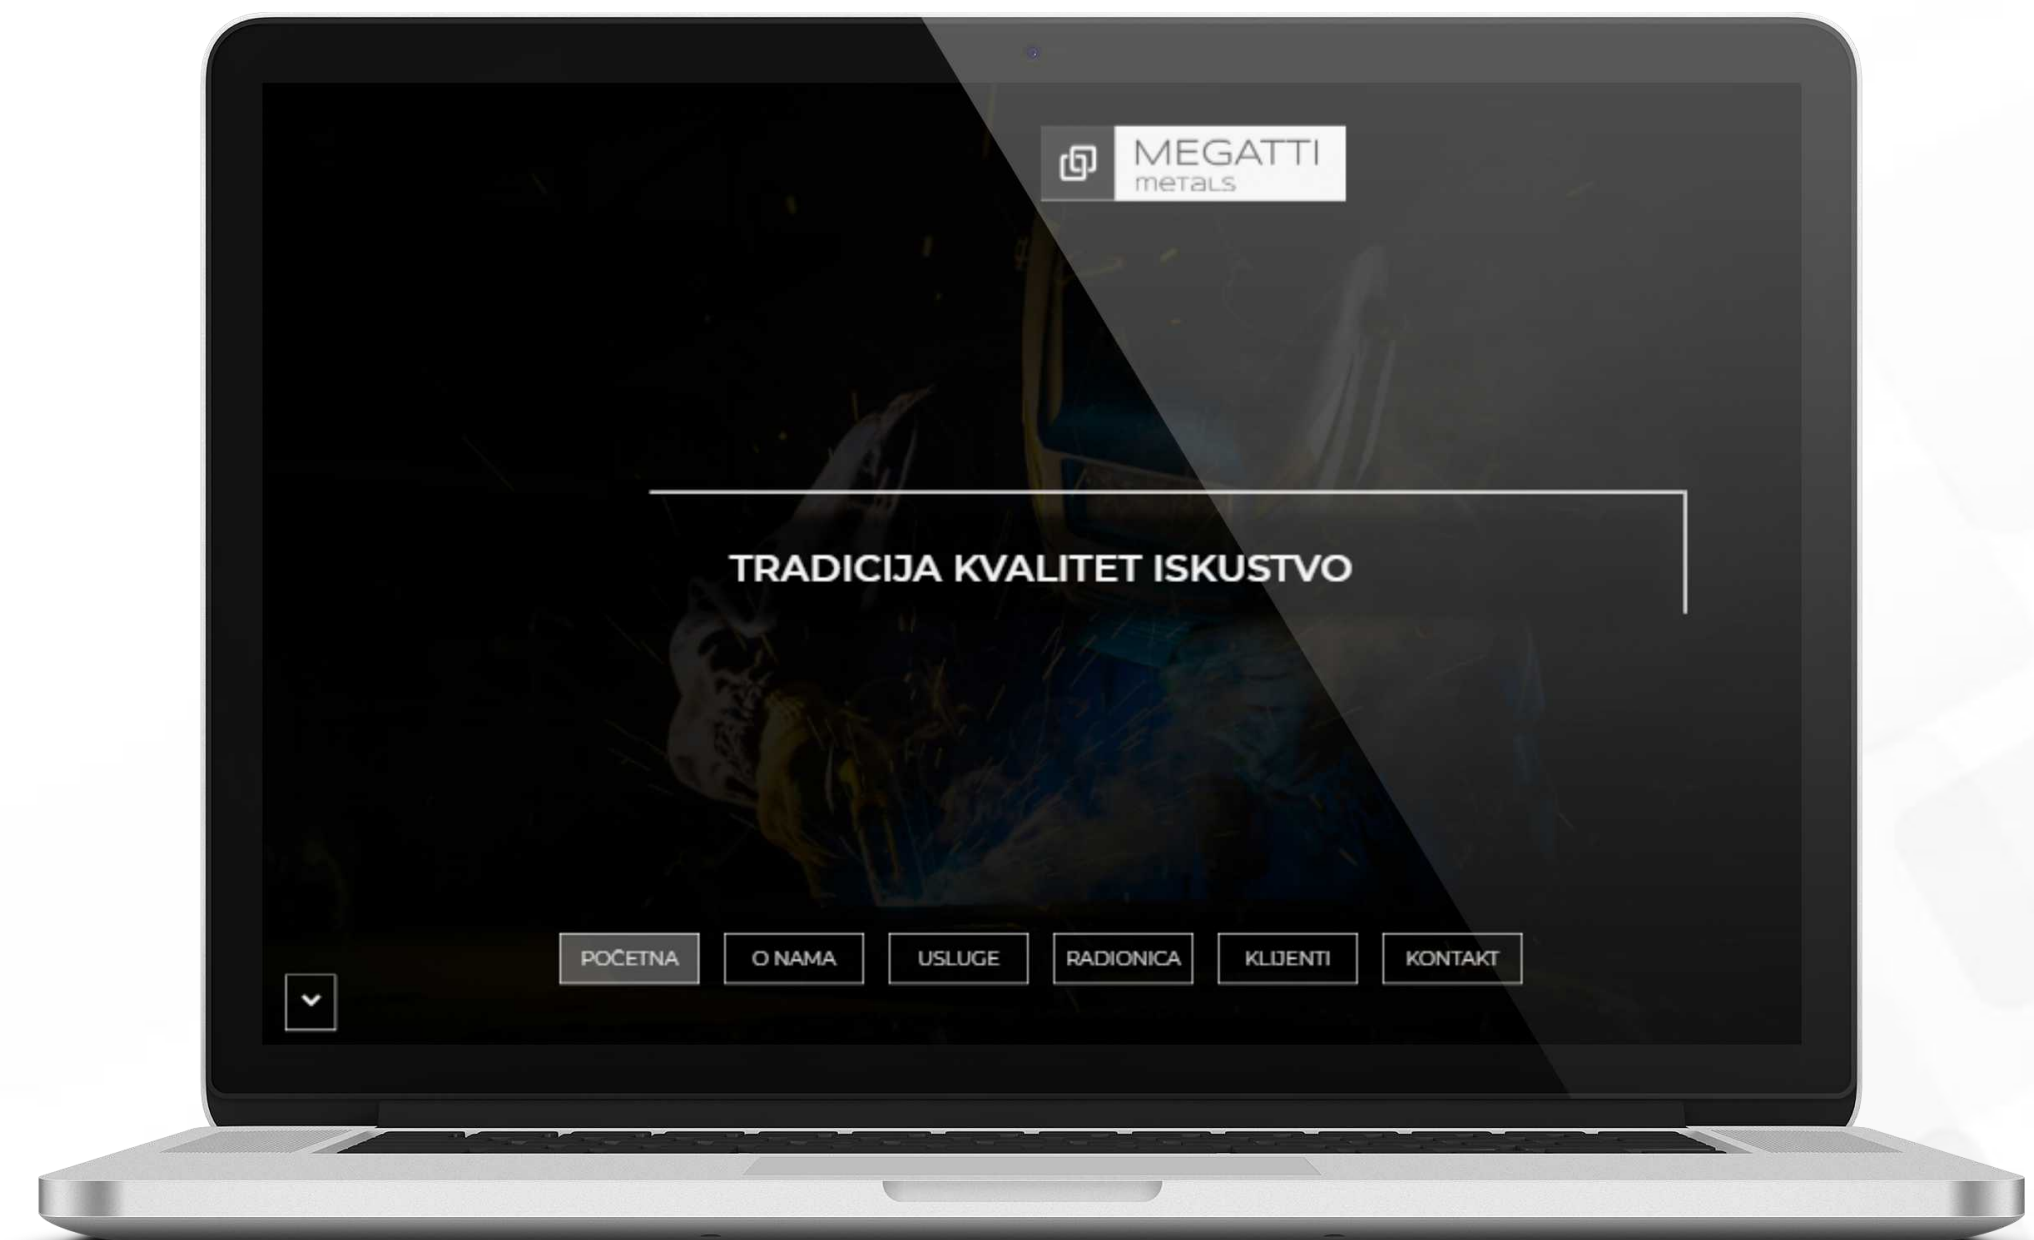

We have inserted simple animations on certain elements in order to give the website a modern look and dynamics.

Megatti Metals

For our clients with a tradition of 40 years, we have created an unusual and modern website to show all their metal services in a new and interesting way.

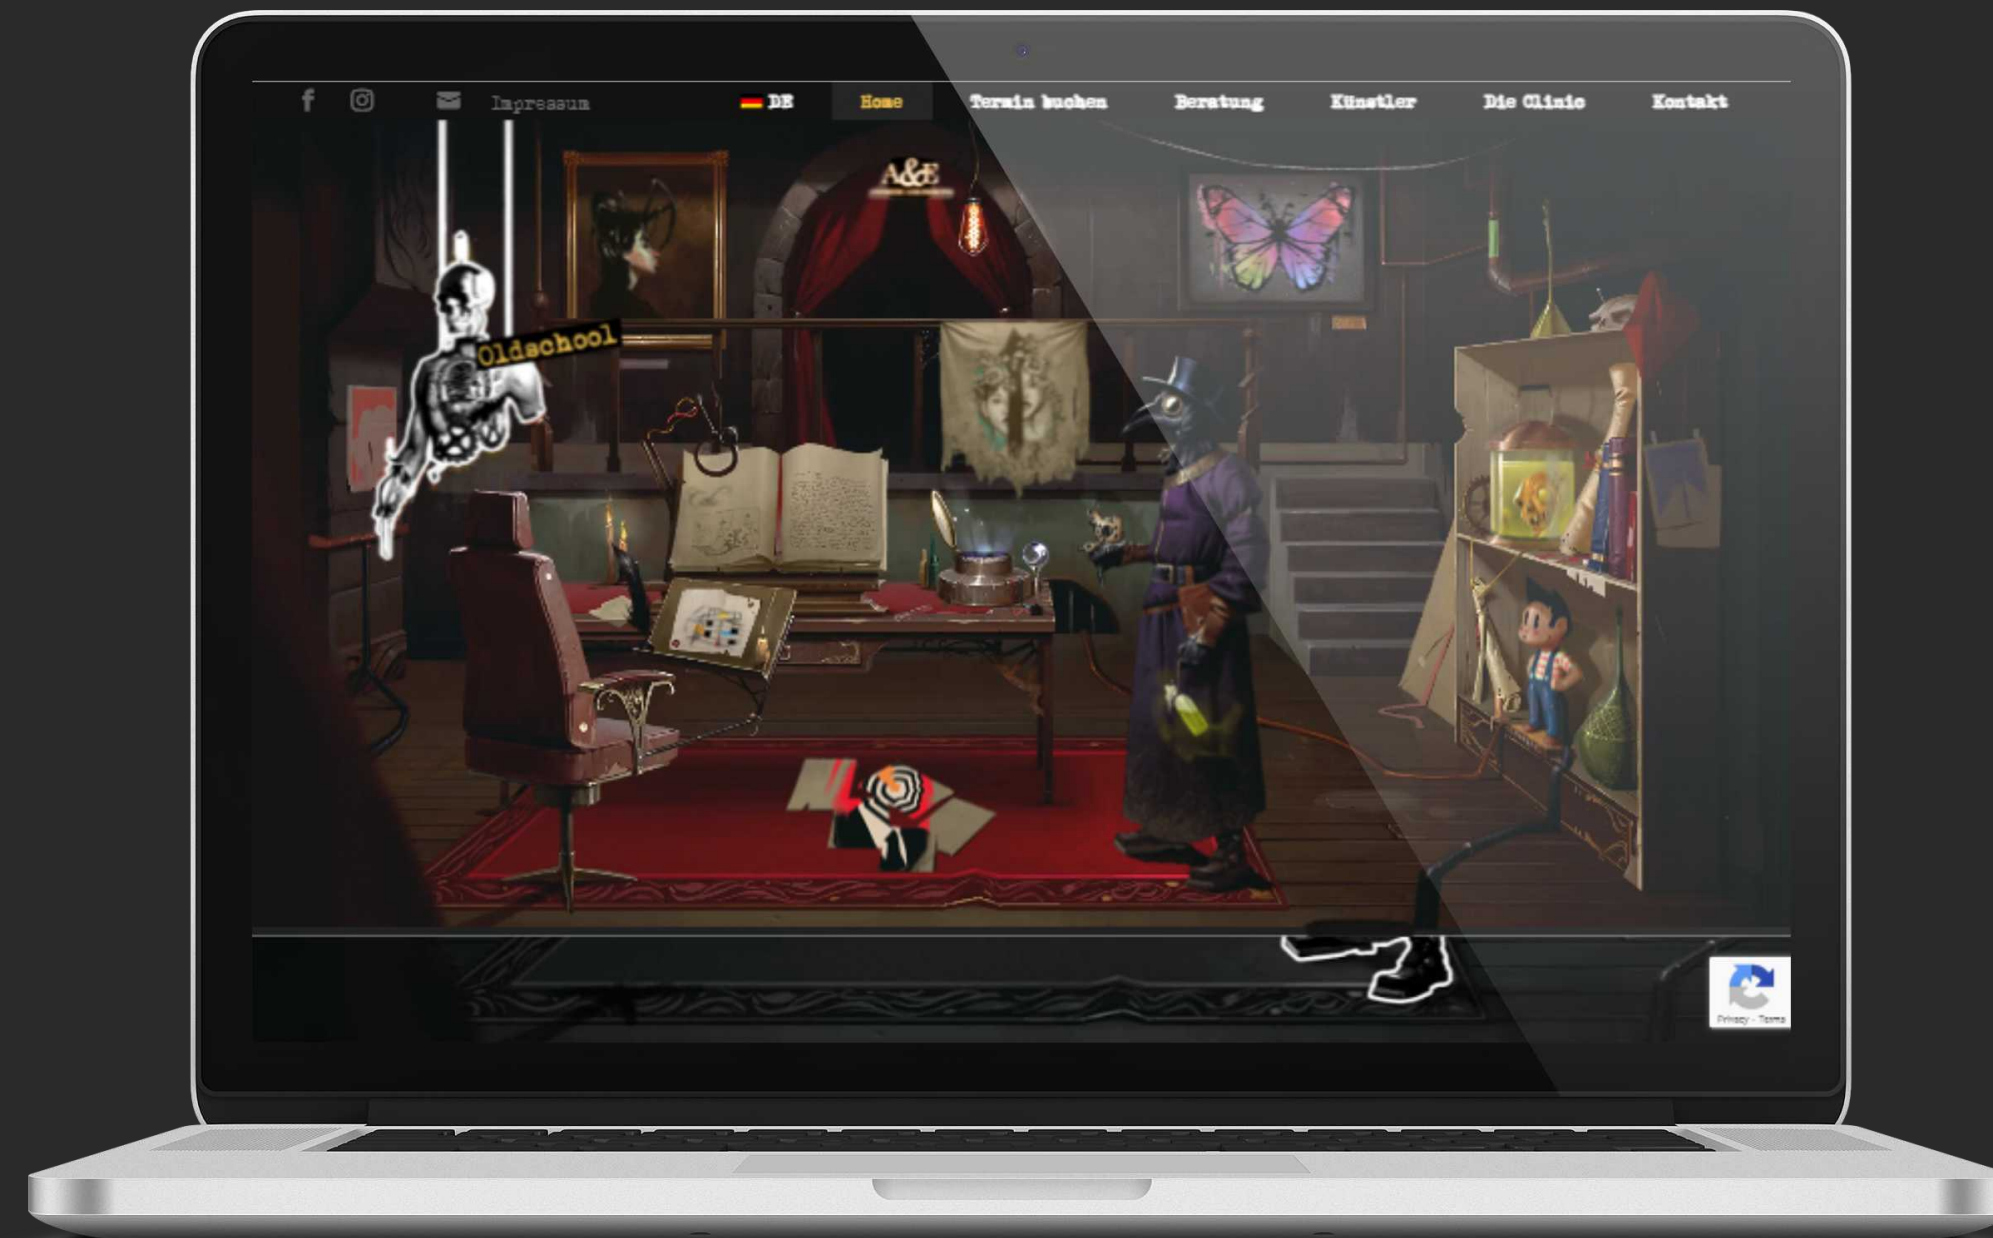

By using the relationship between dark backgrounds with photos and white content, as well as unusual animations and transitions with a clear and clean font, we have achieved that the entire content stands out and looks modern and dynamic.

We have implemented a contact form along with all the necessary information to give visitors the opportunity to contact our client.

megatti-metals.com

Color Clinic Tattoo Studio

color-clinic.com

We have created a modern, interactive and unusual website for our clients to promote the Color Clinic Tattoo studio in Leipzig. The website itself has experienced many iterations, and the current version uses black and gold as base colors, while the font has been customized to be readable by all visitors.

Certain parts of the website are also dominated by red to highlight certain projects of this studio.

Illustrations have been specially created for the website, which we have incorporated in the form of interactive animations, where the click on them opens modal windows with examples of tattoos. Also, a special plugin has been created for this website so that all tattoo artists, categories and tattoo examples can be managed.

The site is also linked to the kisscal service for managing reservations for tattoos, paying for them and purchasing gift coupons for tattoos. The site has multilingual functionality and is specially optimized for mobile devices.

Team:

- Amar Bešlija - Developer
- Šejla Bratić - Designer
- Edita Tahtović - Copywriter
- Bojan Stojčić - Designer

Color Clinic Blog

For our client - Color Clinic Tattoo, we have created a modern and clean blog for publishing all interesting articles related to the tattoo industry.

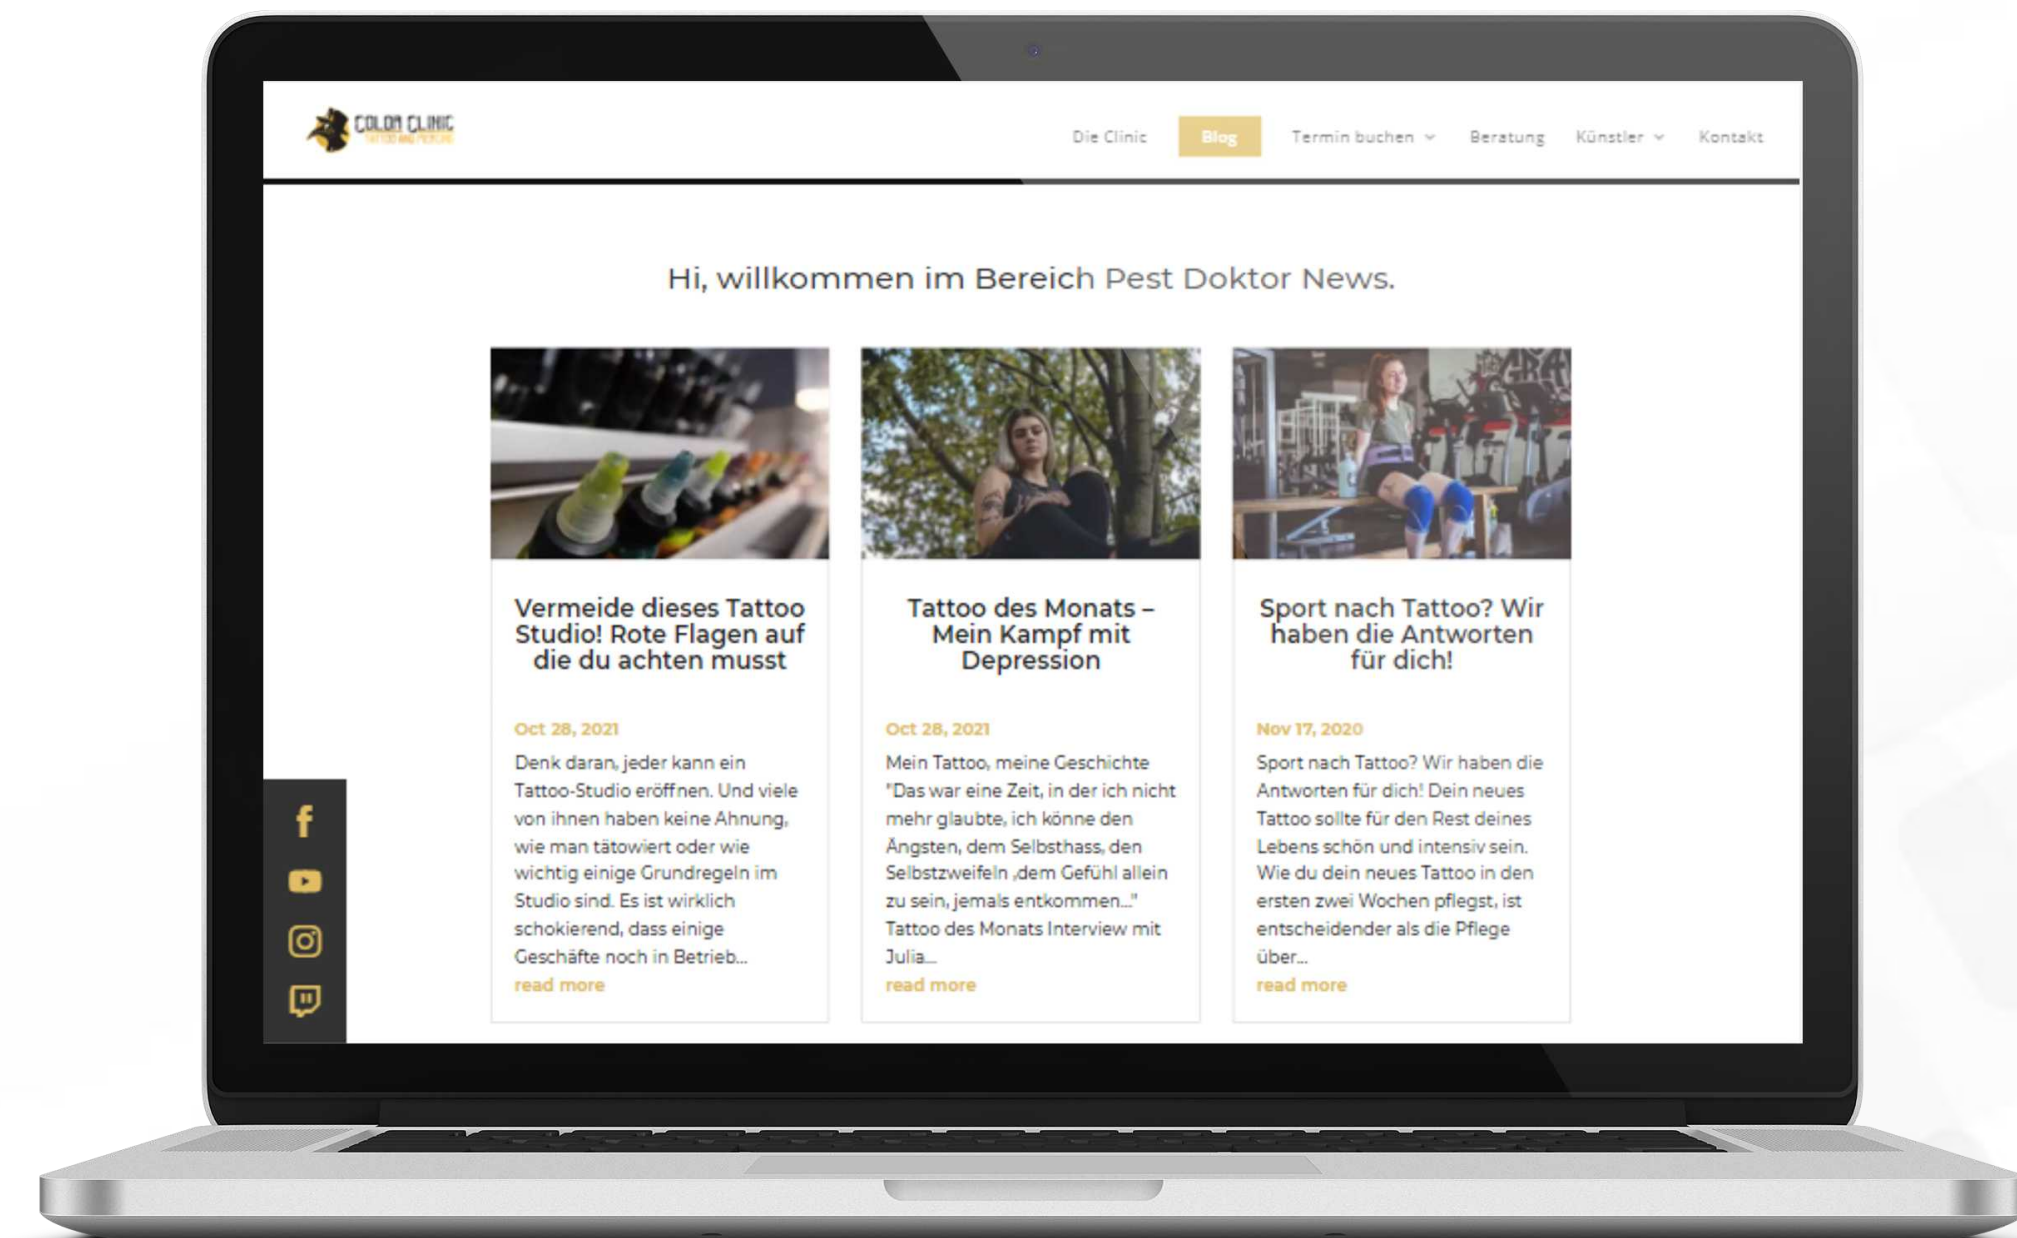

We have linked the blog itself to the main website color-clinic.com, in order to contribute to more visits to the main website.

For the basic colors, we took white and dark gray, and we marked the important places with red, which is the main color of this company. Also, SEO optimization for the site itself and all articles on it has been implemented.

- Edita Tahtović - Copywriter

blog.color-clinic.com

Color Clinic Shop

shop2020.color-clinic.com

For our client - Color Clinic Tattoo, we have created a modern and simple web shop that would allow the sale of merch and the tattoo services themselves through using PayPal.

We used dark gray and white as base colors, and we marked all important places on the website with red color.

We adjusted the font to match the base font on the main color-clinic.com website.

The shop has all the possibilities of the customer, product and sales / purchase management.

Created within Dom Collection d.o.o.

Team:

- Šejla Bratić - Designer
- Edita Tahtović - Copywriter

Ink2Innovation

We have created a modern, informative website for our client with the aim of promoting marketing services for the Tattoo industry of the Ink2Innovation company.

We used white as the basis color, while we marked important places on the web page with the dark gray color that appears also within the animations on the home page.

We used font which can be found on the company logo.

ink2innovation.com

Moja Gradnja – Build d.o.o

mojagradnja.com

For our client, Build d.o.o. we have created a modern, informative website with the aim of presenting the construction company to the market.

For the basic colors, we chose white and the dominant red color, where both the colors and the font are adapted to the logo itself. Within the website, we presented all the services of the company itself, and we implemented contact forms and added other contact information for visitors.

We have also implemented a blog called “Notices” to give the client the opportunity to publish various informative articles for their visitors.

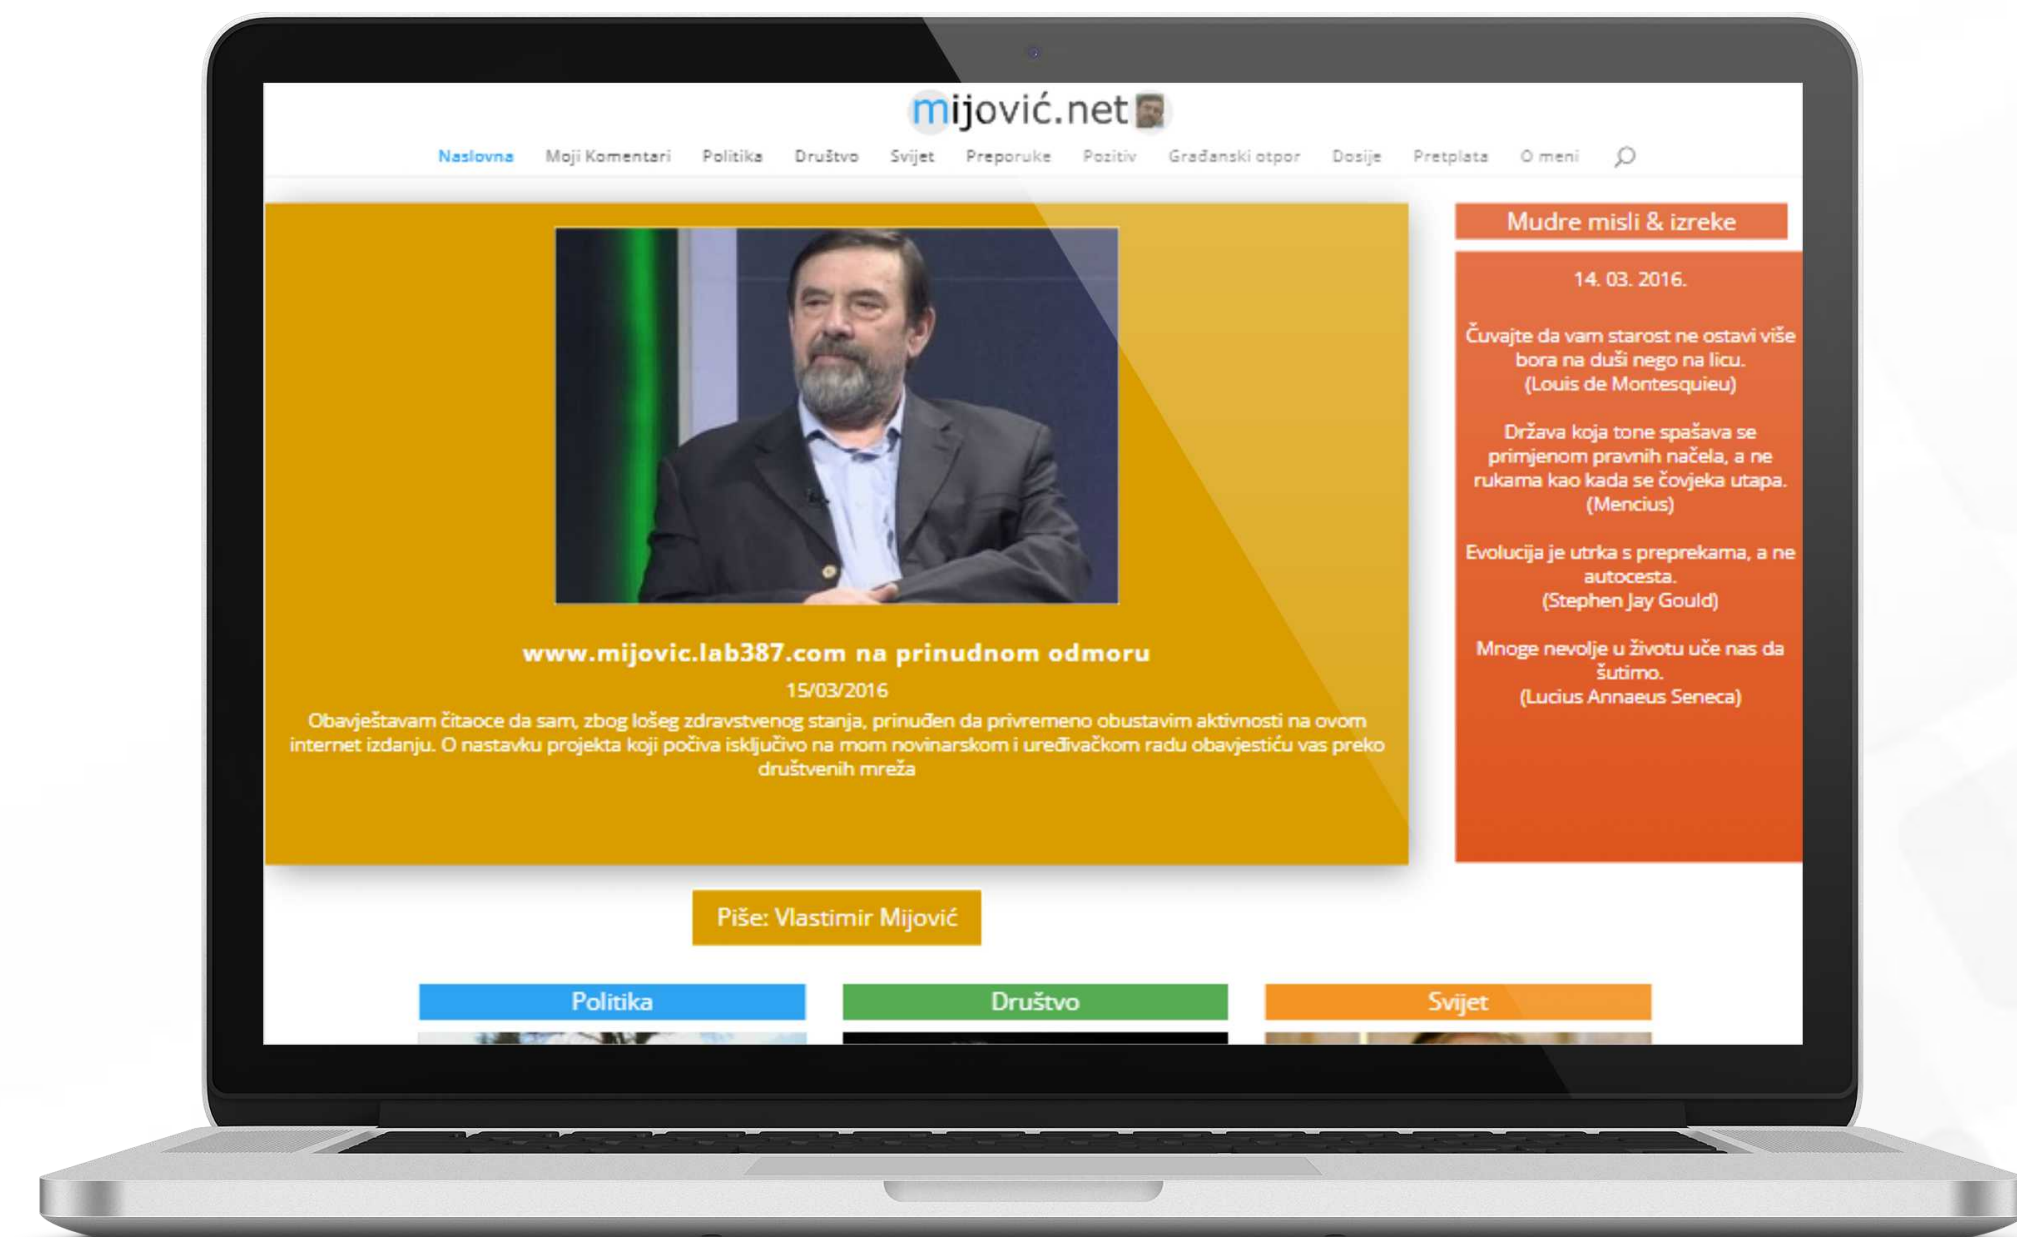

Vlastimir Mijović Portal

For our client, Vlastimir Mijović, we have created a modern and simple web portal for publishing different types of texts.

We transferred the entire content from the blogger to the WordPress platform, and then we created a new design.

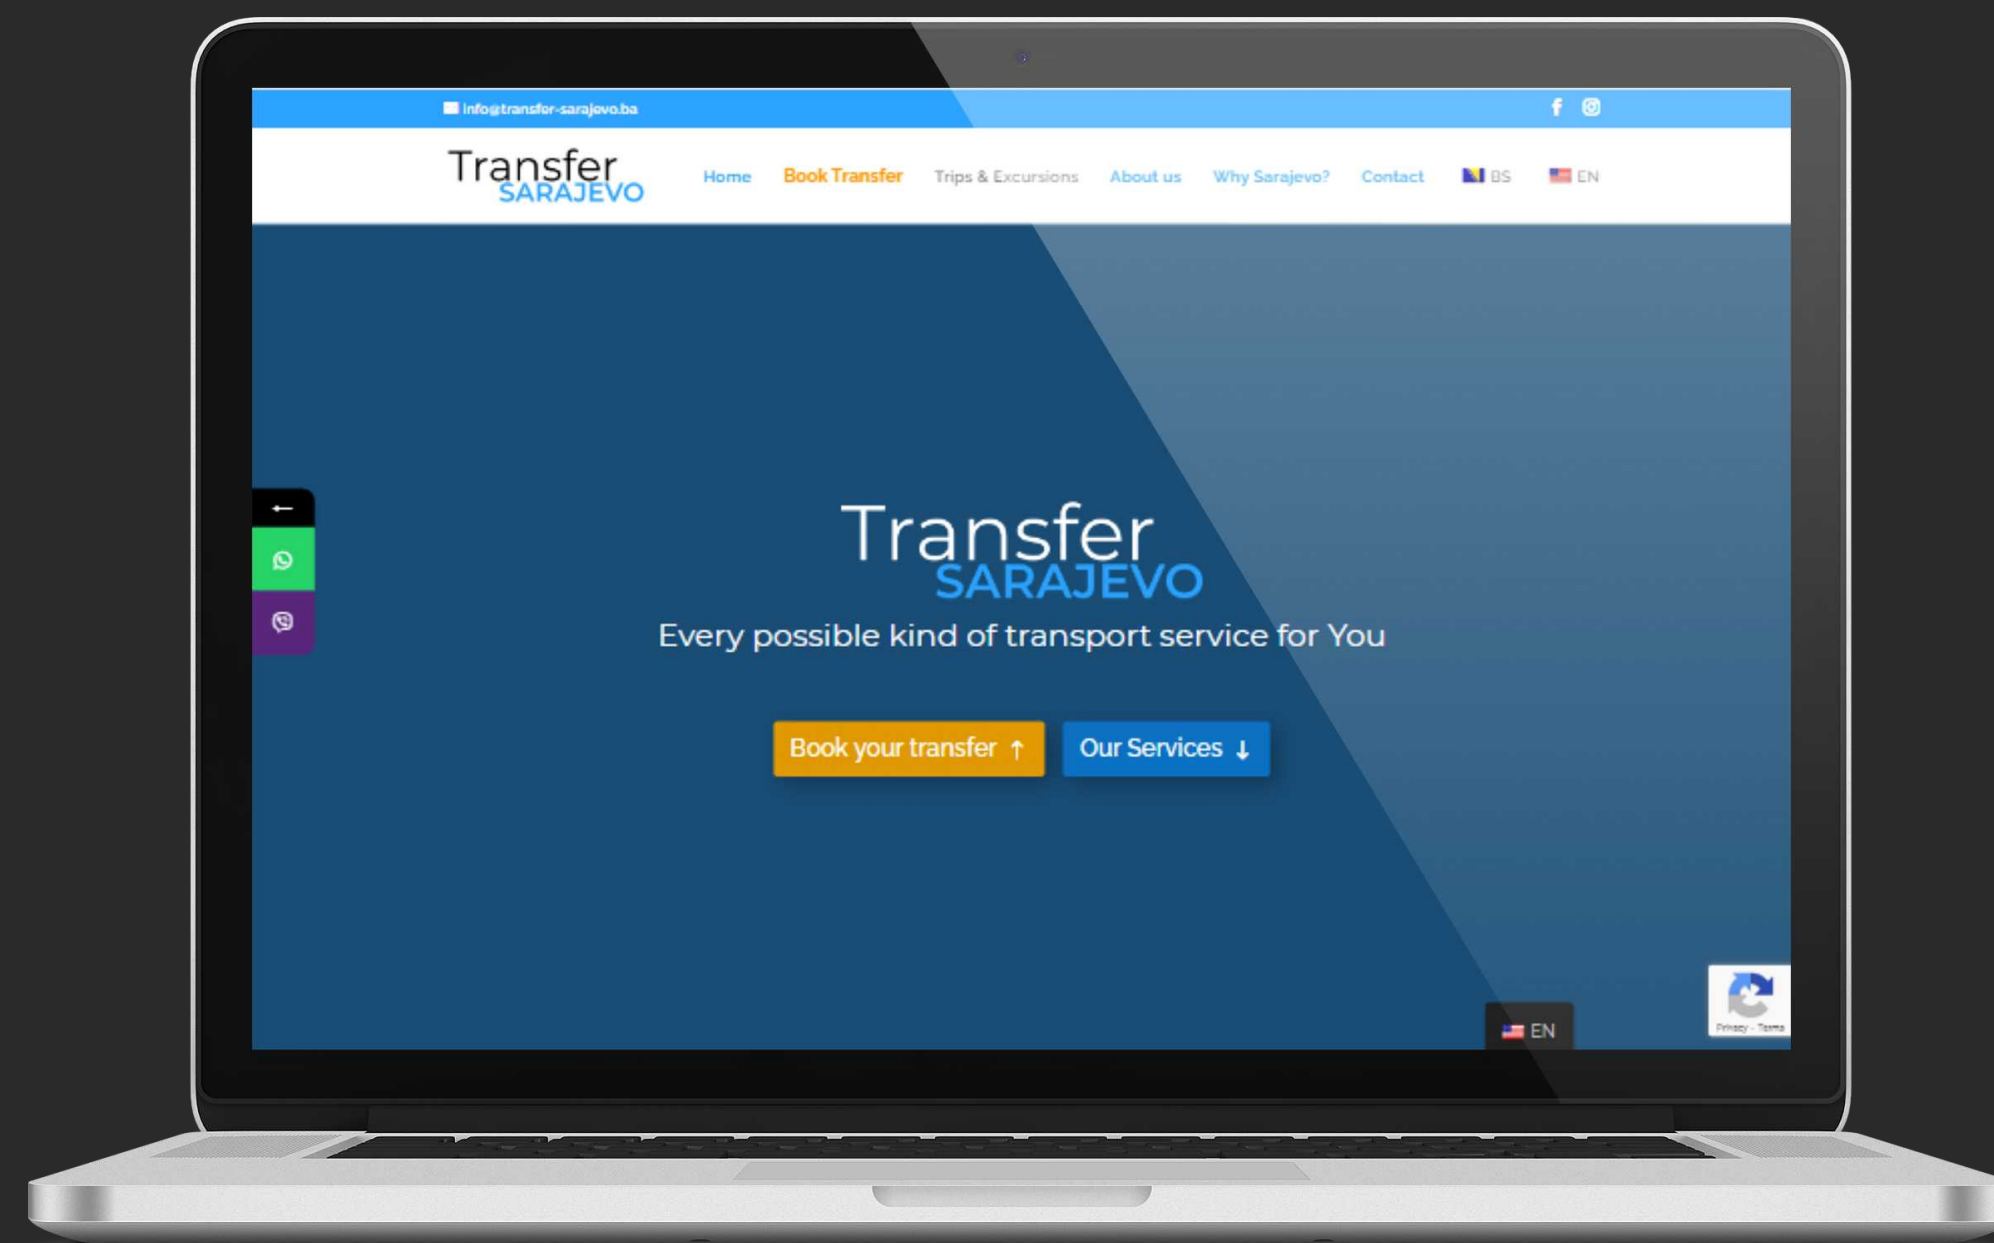

We also divided the content into different journalistic categories, with different colors, in order to make it easier for potential clients to find their way within the website.

Within the website, a subscription to the portal itself is implemented using PayPal payment.

mijovic.lab387.com

Transfer Sarajevo

transfer-sarajevo.ba

We have created a modern, informative and bilingual website for our clients to promote their transport services.

For the basic colors we took white and blue, and we used a font appropriate to the basic logo of our clients.

We have implemented the functionalities of the contact form as well as the reservations of the transport services themselves.

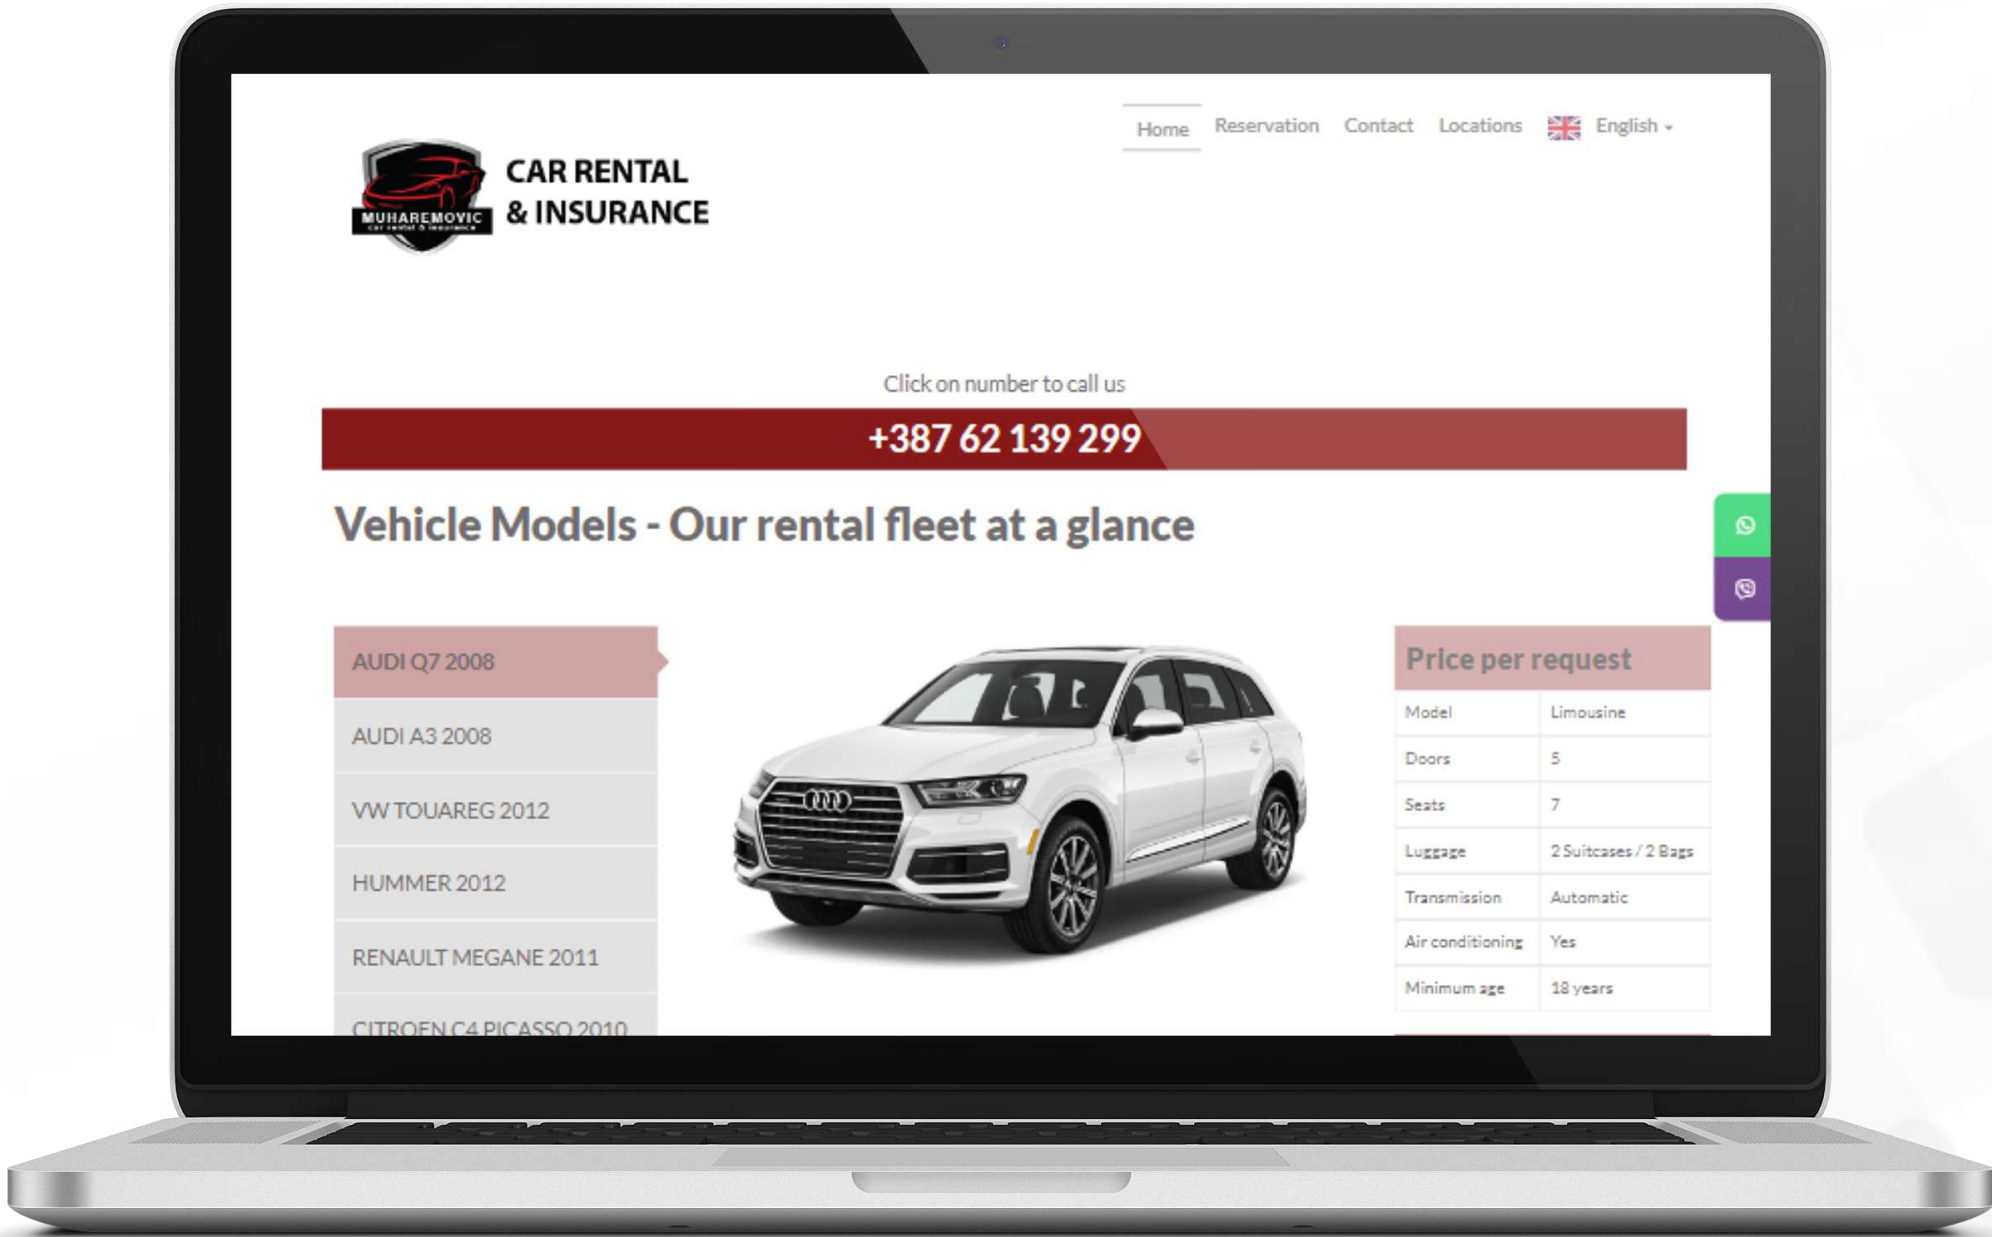

Rent a Car Muharemović

For our client, we took over the existing website, switched it to better and faster hosting and edited it in accordance with modern standards of the profession.

We reorganized the entire structure, inserted calls to action, and merged different sections of the site to work together.

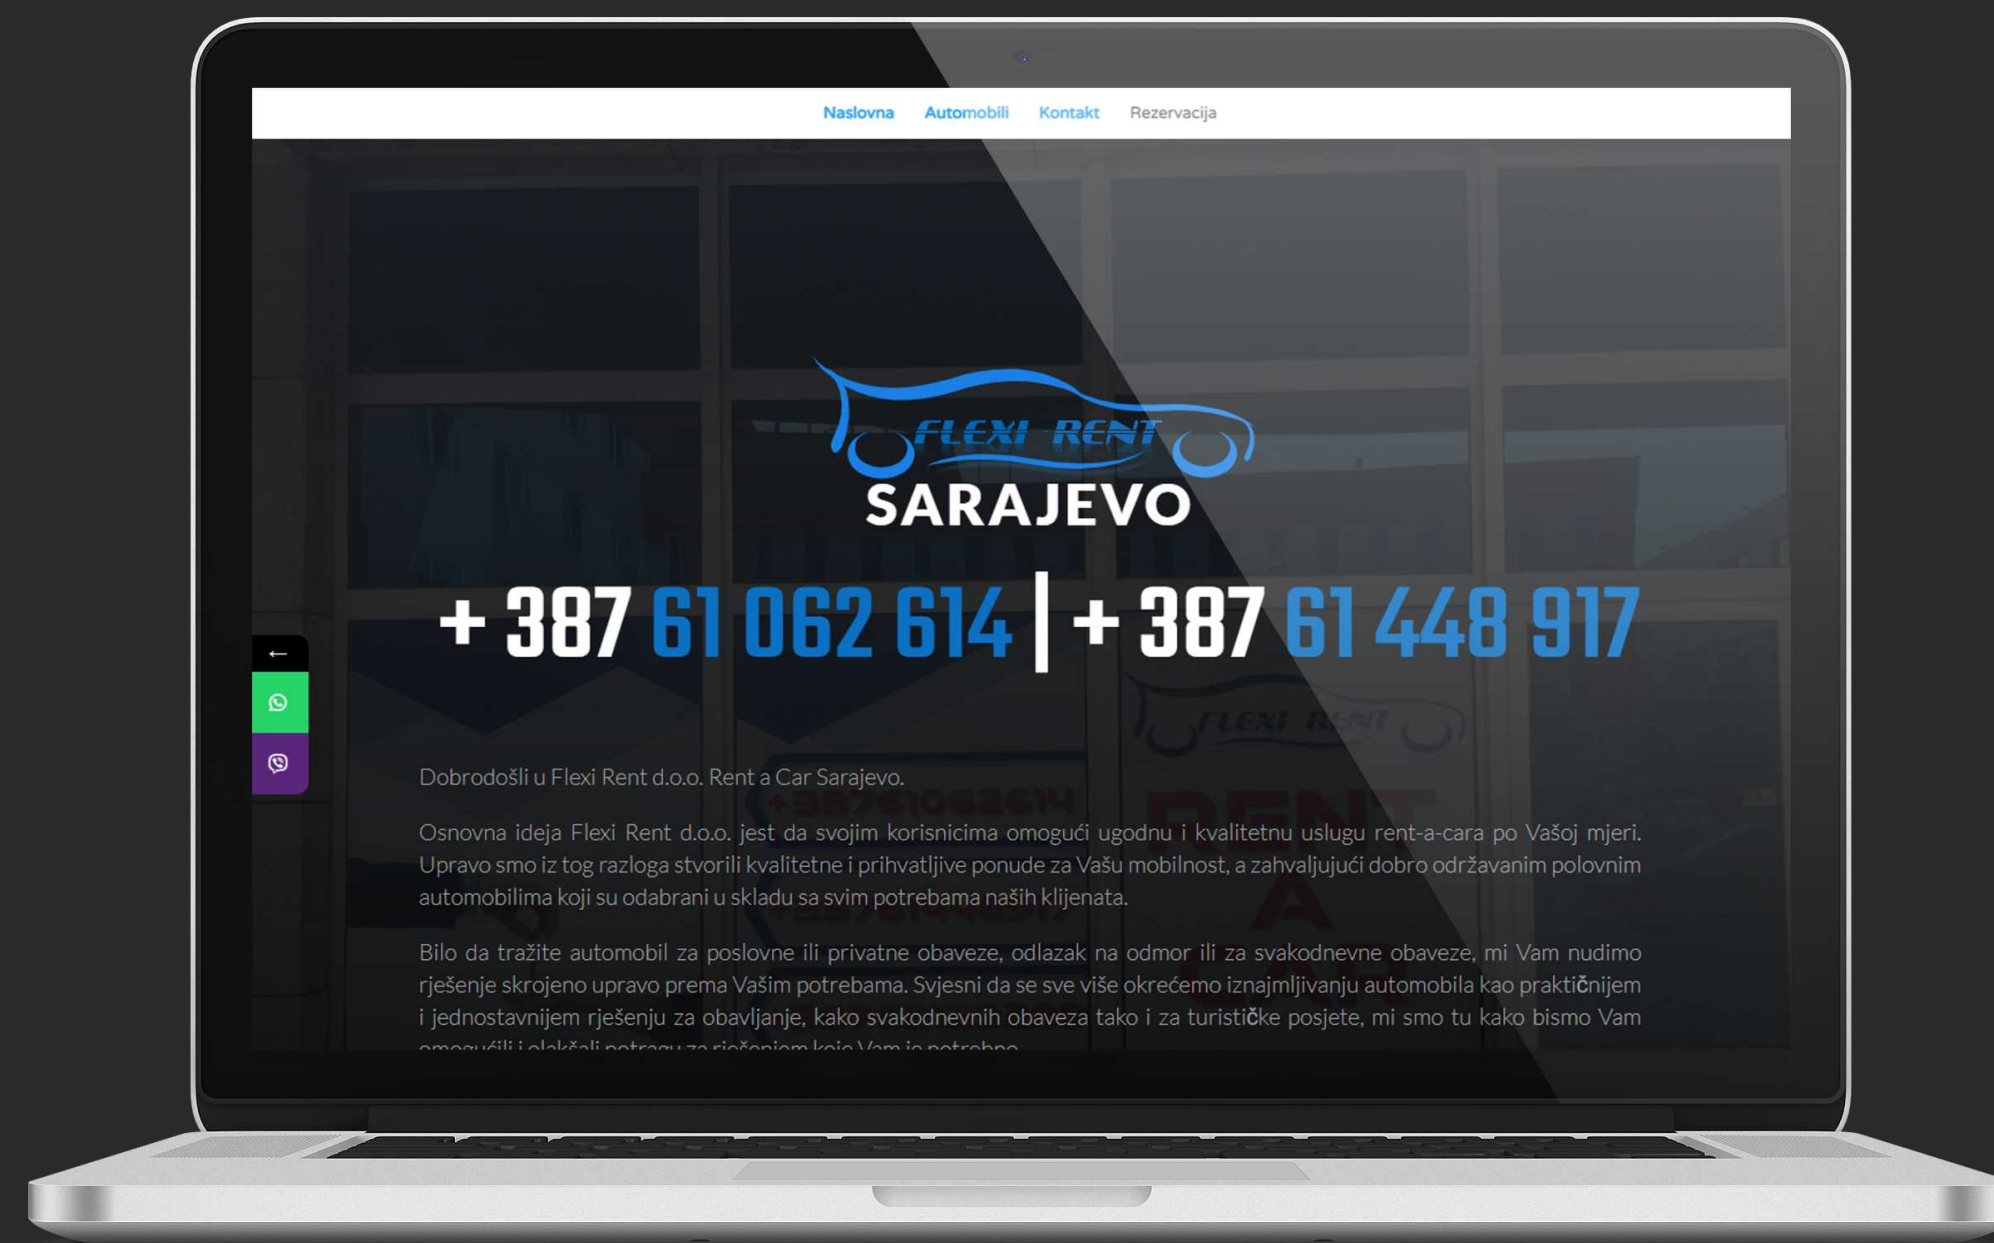

We added the possibility of translating the site and we did the translations ourselves in order to enable our client to work with foreign clients - tourists.

We also included information about car washes and created the possibility of online car reservations.

muharemovic.lab387.com

Flexi Rent – Rent a Car

flexirent.lab387.com

For our client, we took over the existing website, did a complete redesign along with the content, and moved it to better hosting.

We did a reorganization of the structure together with the content, where we did a complete copy and editing of the photos.

Within the website, we made custom forms next to each of the cars to give visitors the opportunity to book online.

We have also integrated PayPal for advance payments when booking cars online.

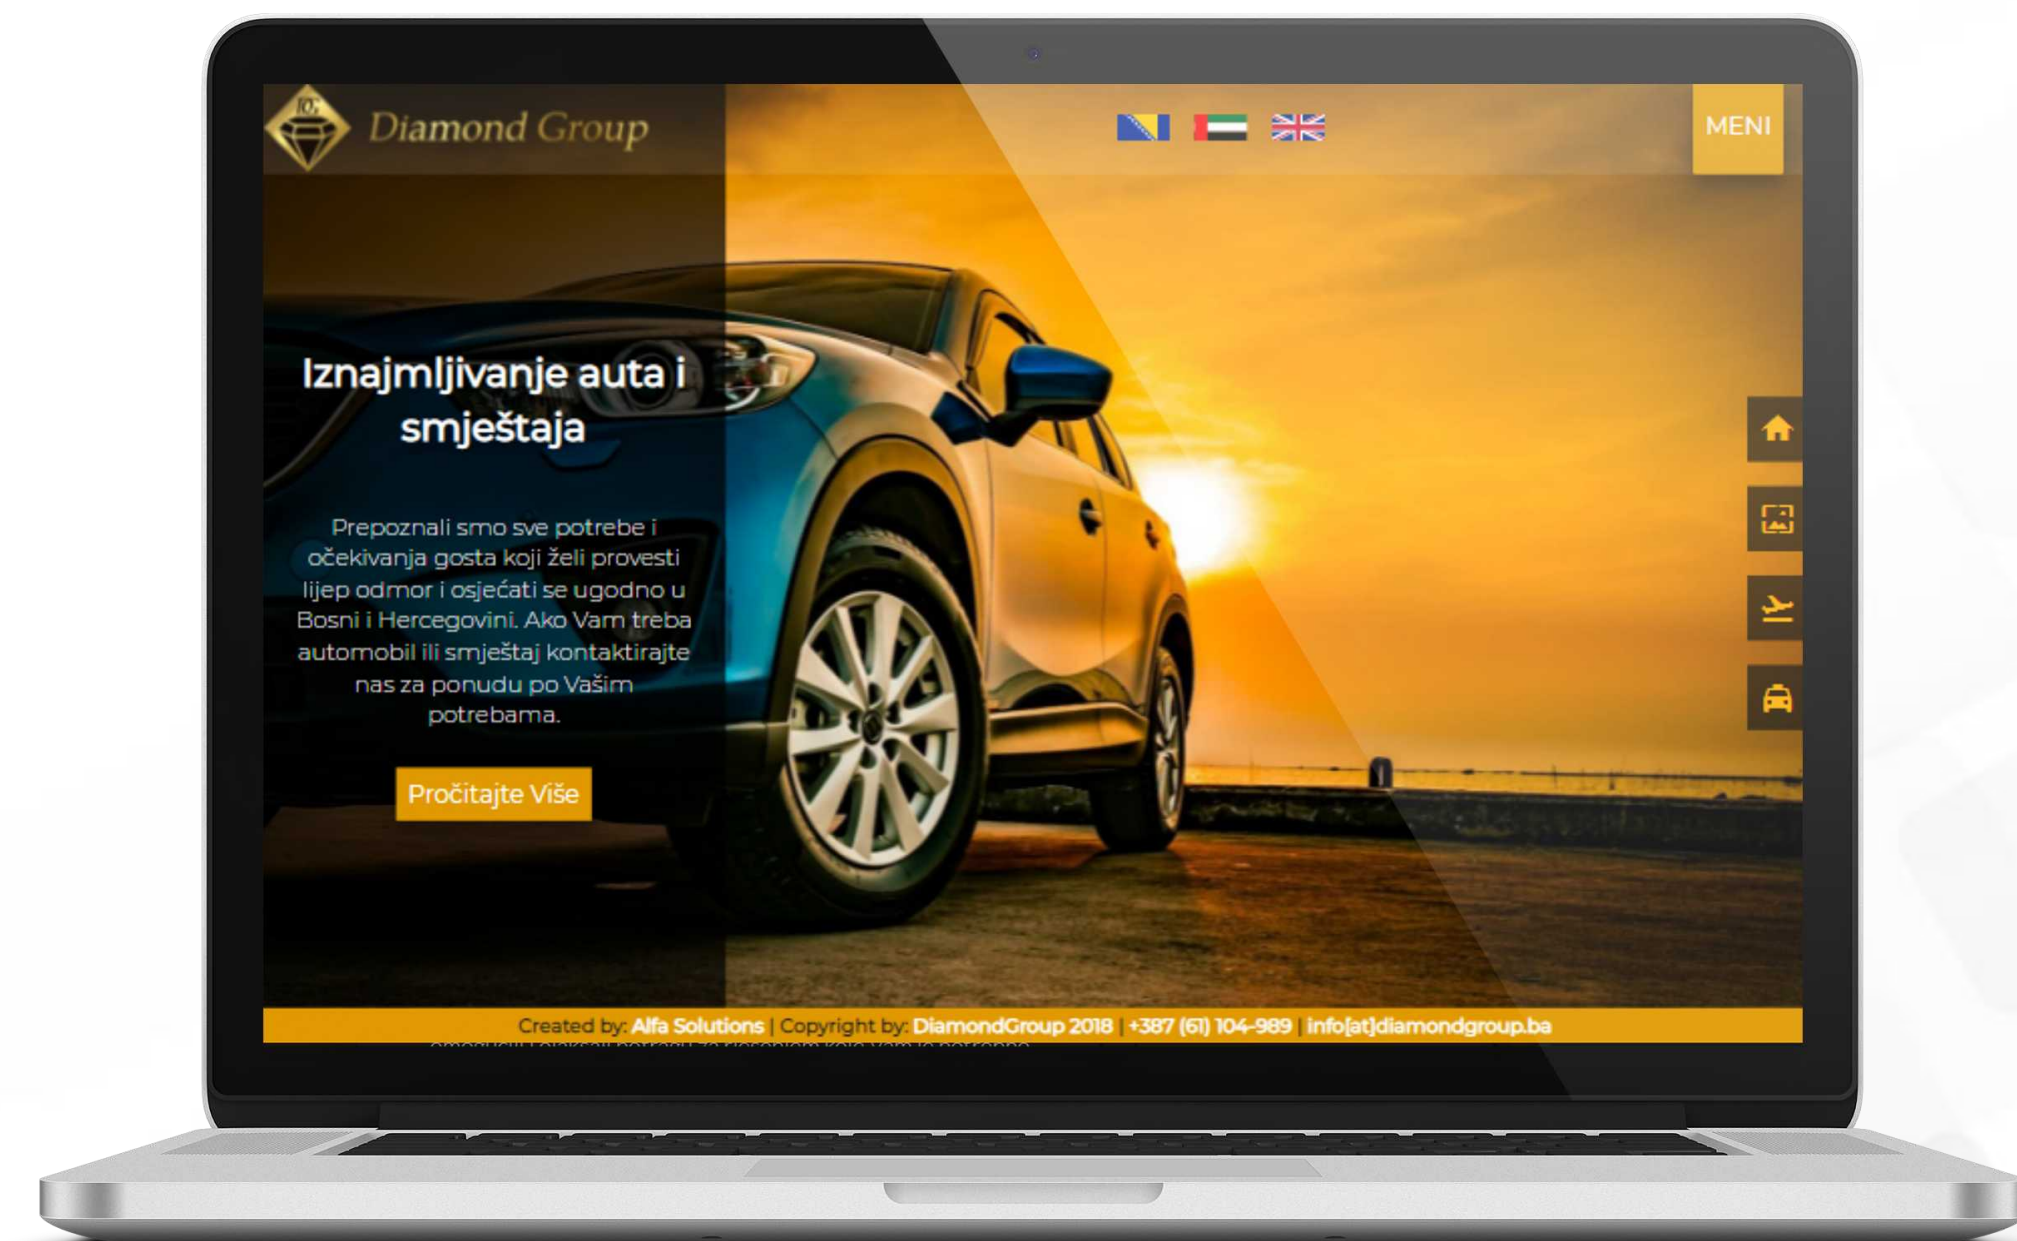

With simple animations and transitions, we have introduced a dose of modernity and interactivity within this website.

Diamond Group

We have created a modern informative website for our client in order to present all the services from their portfolio: real estate and consulting, design and construction management, tourist offers as well as car and accommodation rental.

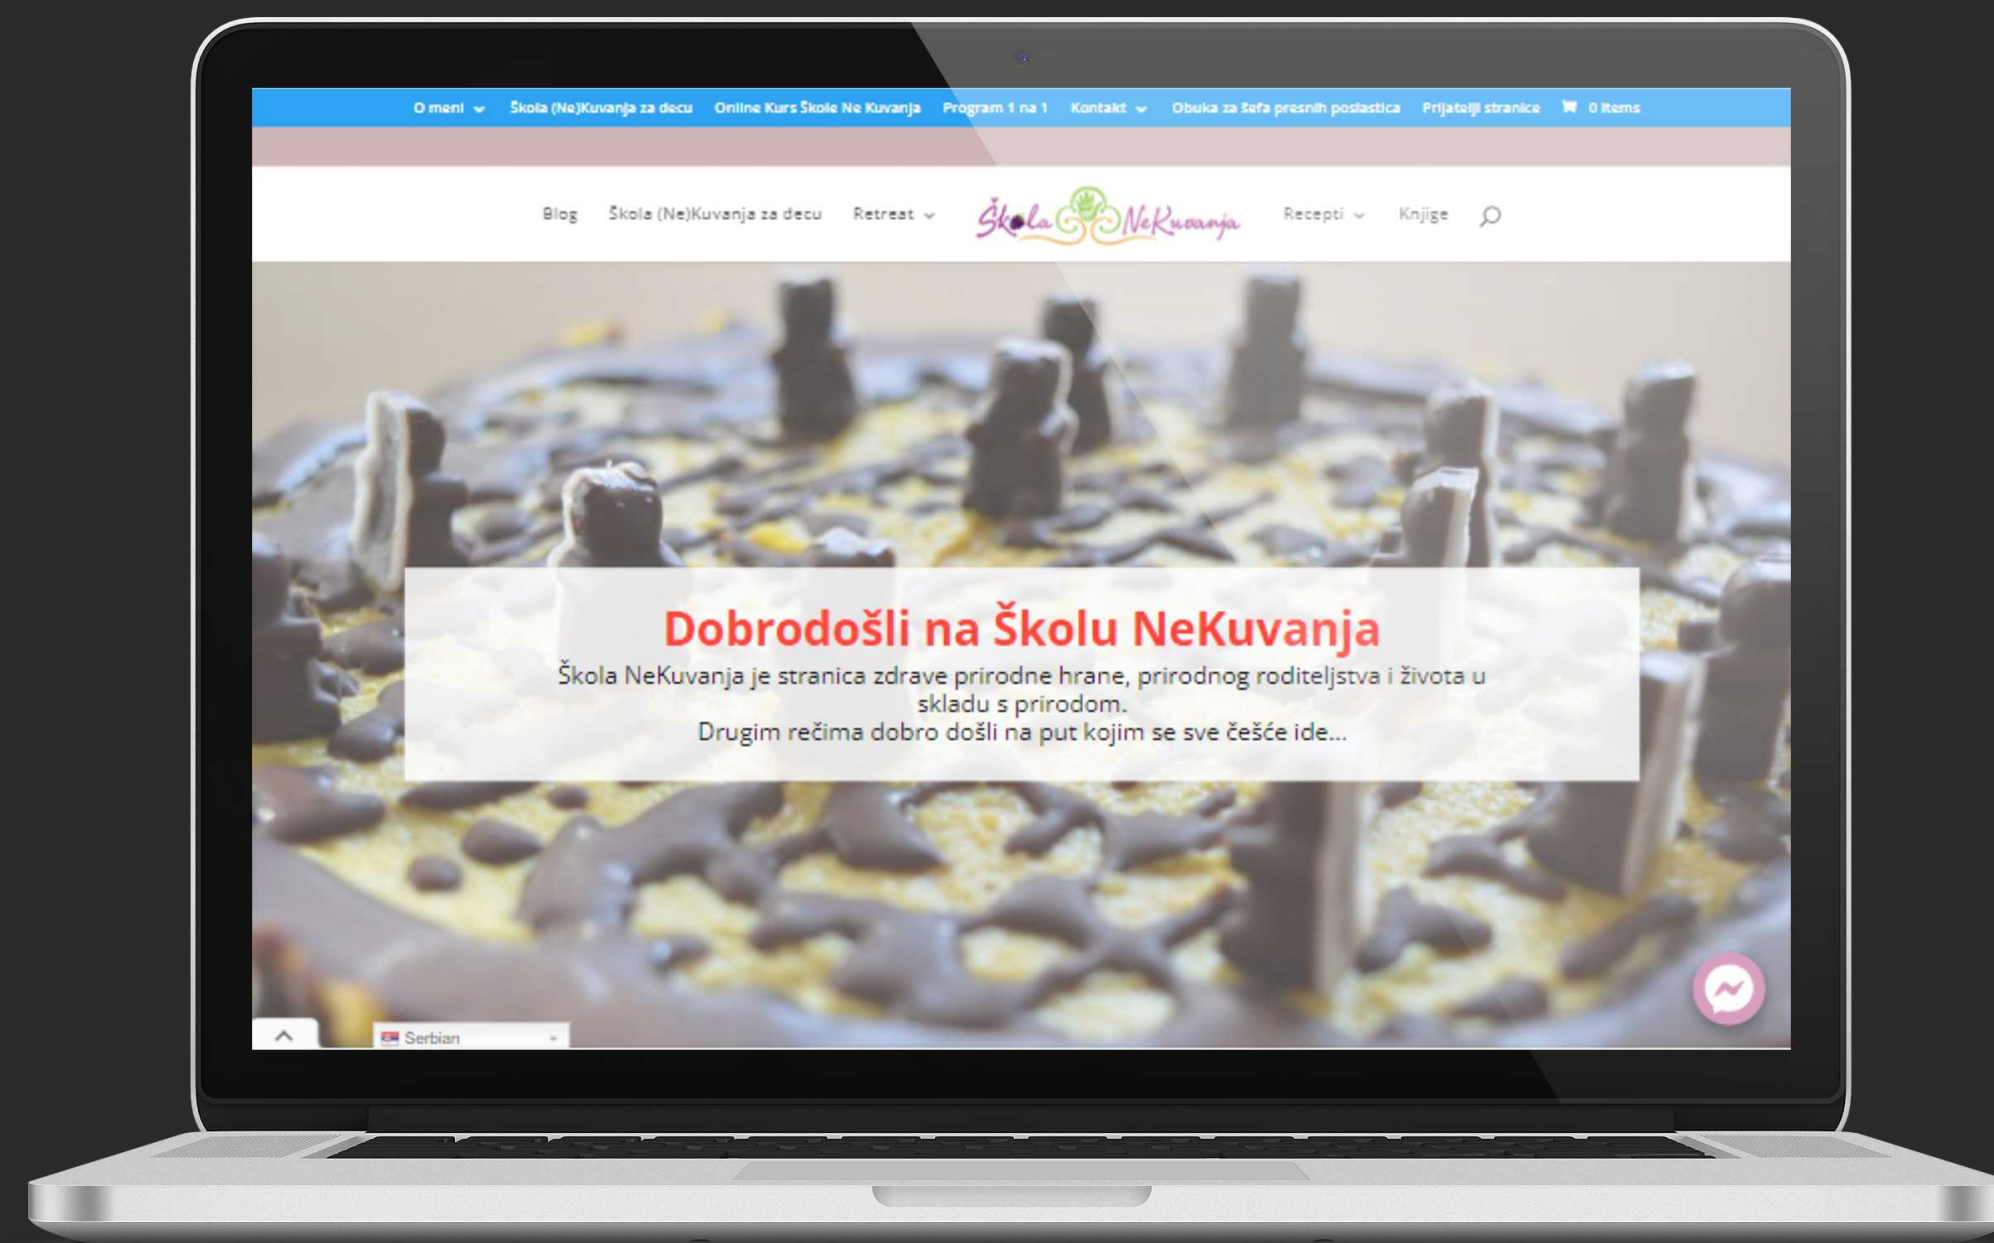

For the basic colors, we used white and orange to adapt the website to the design of the logo itself.

The multilingualism of the website itself, the interactive display of photo material, the interactive menu / menu as well as the possibility of a contact form for all website visitors have been implemented.

diamondgroup.ba

Škola nekuvanja

skolanekuvanja.com

For our client, we have created a modern and bold website to promote healthy eating through texts, book sales, recipes and other programs.

For the base color, we took white along with blue and pink to customize the page to our client's logo itself.

We have implemented the ability to add different types of content, Google Adwords ads and contact forms.

Guardia Di Pace

For our clients, we have created a modern, interactive and unusual website to promote a very interesting area - nurturing the Knights of Peace.

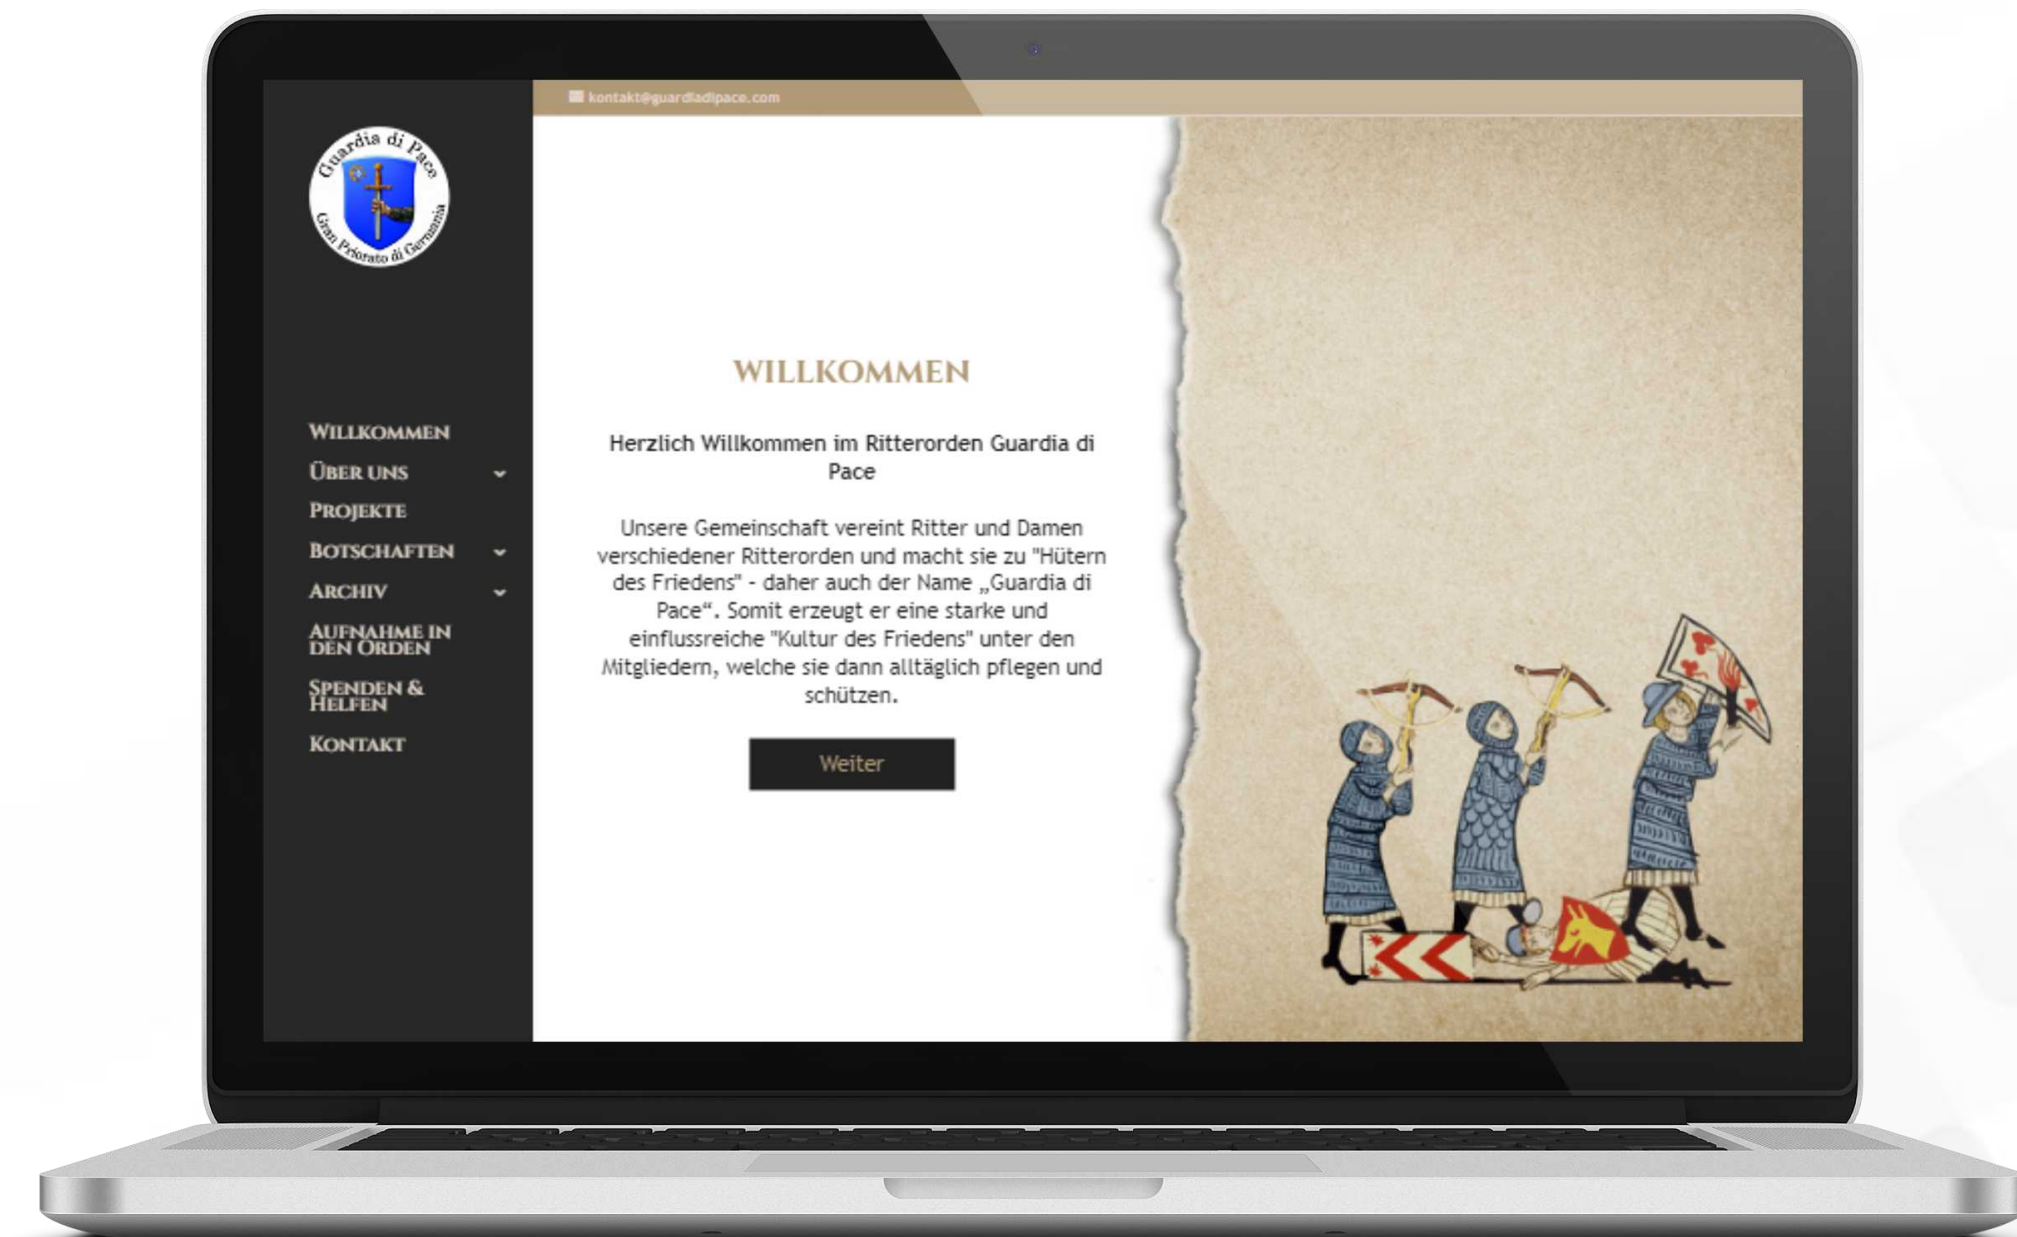

The basic colors are white, dark gray and brown to evoke all the chivalrous values that this association nurtures.

We have implemented interactive navigation for PC and mobile devices, the possibility of donating to the association as well as a contact form for all visitors to this site.

Created within Dom Collection d.o.o.

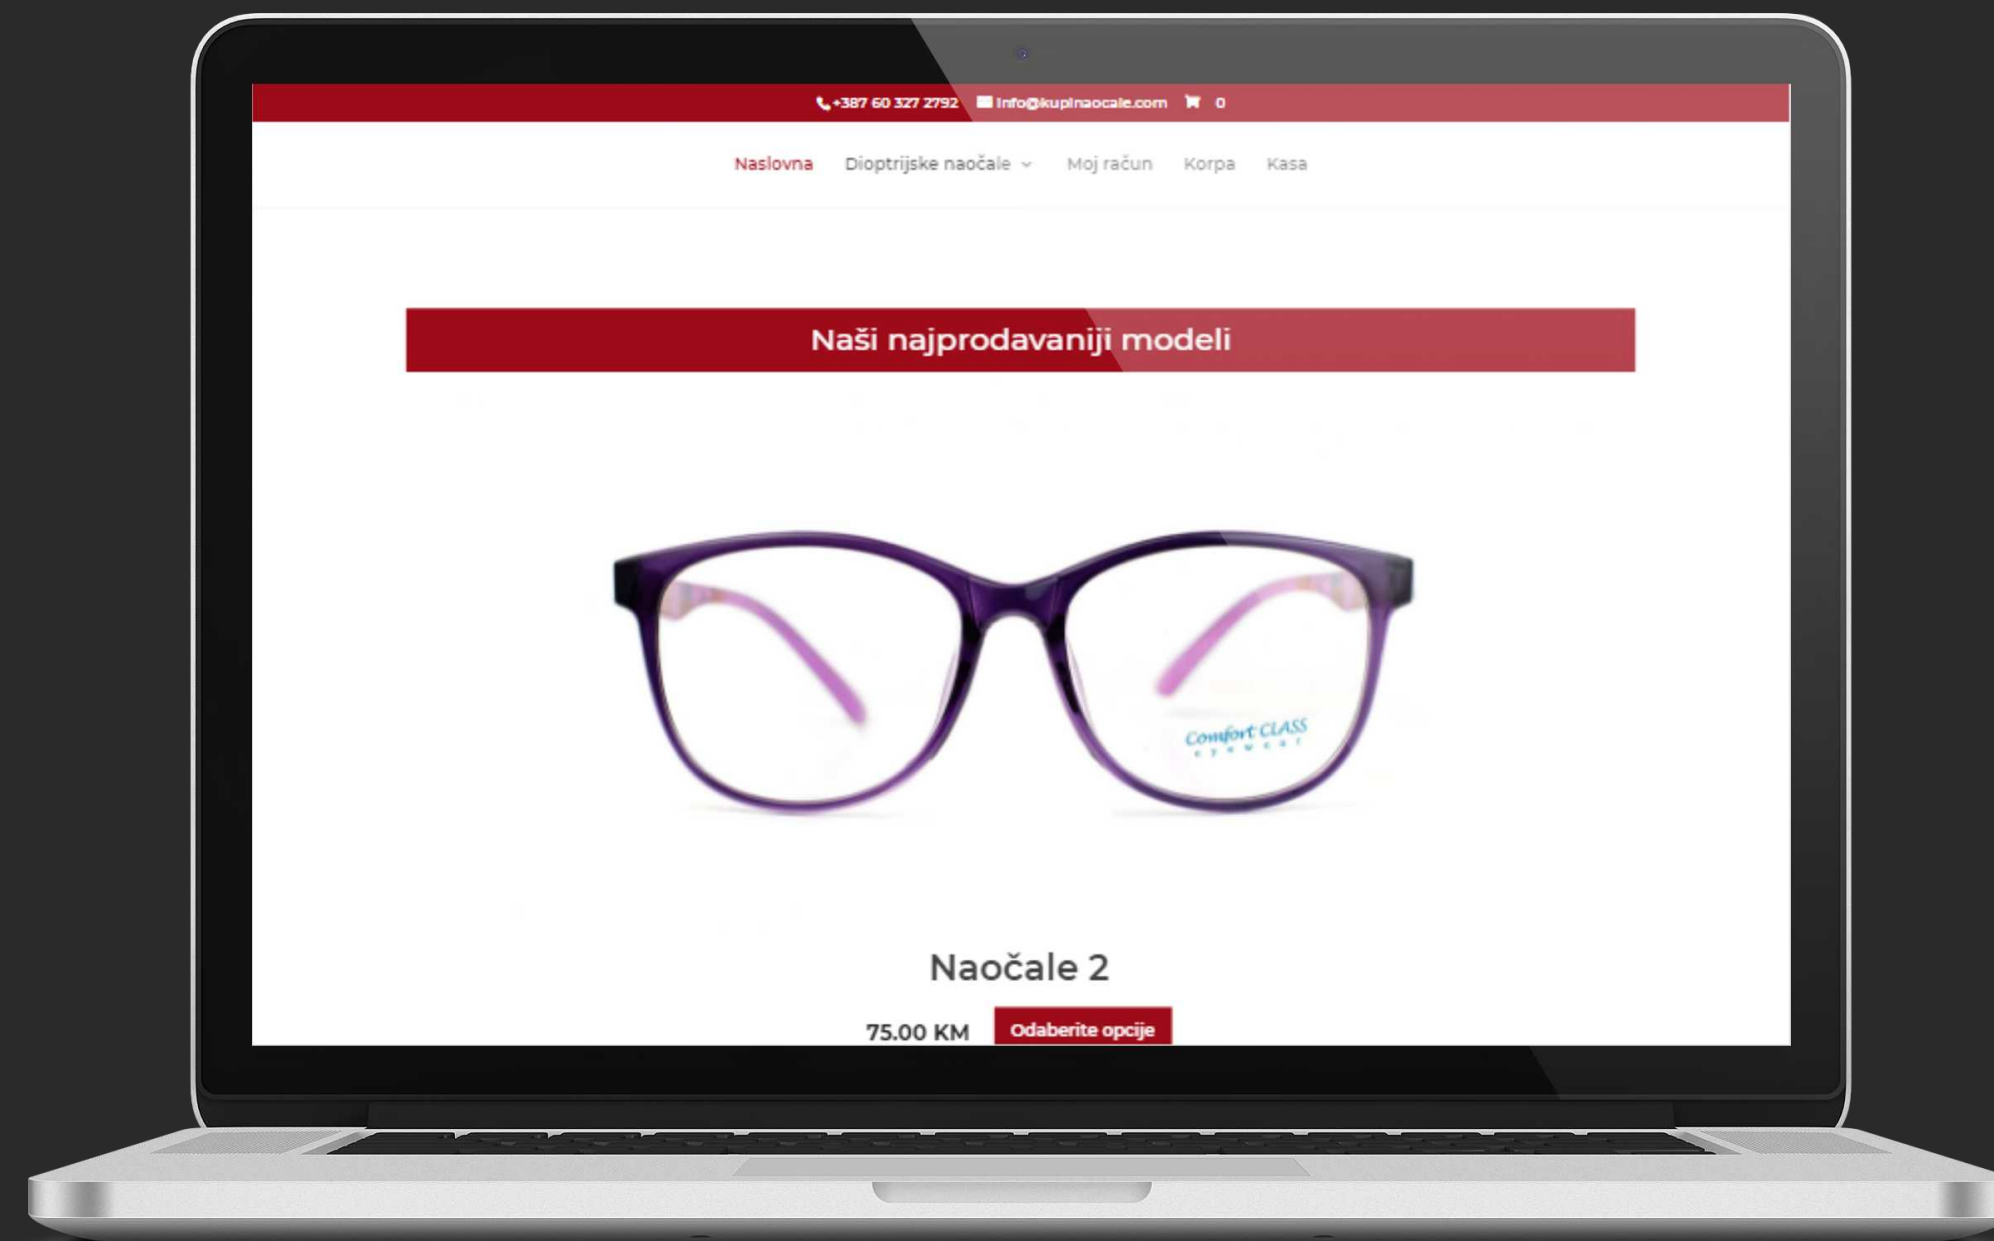

Team:

- Amar Bešlija - Developer
- Šejla Bratić - Designer
- Edita Tahtović - Copywriter

guardiadipace.com

Kupi Naočale Web Shop

kupinaocale.com

For our client, we created a modern and functional web shop for the sale of glasses, where we took white and gray as the basic colors, while we marked all important places on the website in red.

We used a simple and clean font, in line with the logo, to give space to the content to stand out, especially the products themselves.

Within the web shop, we have implemented all the important things: product, order and customer management, and payment by delivery.

For the products themselves, we have implemented additional functionalities for entering diopter information within the order, related products as well as an interactive display of additional product photos.

We have also implemented a cookie notification along with a privacy policy and set up additional information so that web shop visitors can contact the client.

Restoran Gurme Sezam

We created a modern informative website for our client with their offer of food and drinks, and we linked it with the korpa.ba system for orders and sales.

We used white and orange for the basic colors, while we adjusted the font to the logo itself.

An interactive gallery, map and contact form have been implemented on the site to invite potential visitors and buyers to the action.

gurmesezam.lab387.com

Srebrenica Audiobook

audiobook-srebrenica.ba

For our client, the Konrad Adenauer Foundation Sarajevo, we created a modern and interactive website with the aim of listening to and downloading the audio book "Srebrenica - a chronology of a genocide or what happened to Mirnes Osmanovic" by Matthias Fink.

For the basic colors, we took white and blue to adapt it to the other design of the KAS Foundation, and we chose a clean and sharp font to make reading the content easier.

On the site, we have implemented the ability to download the complete audio book and the ability to listen to it by chapter.

We have also implemented a contact form for all website visitors.

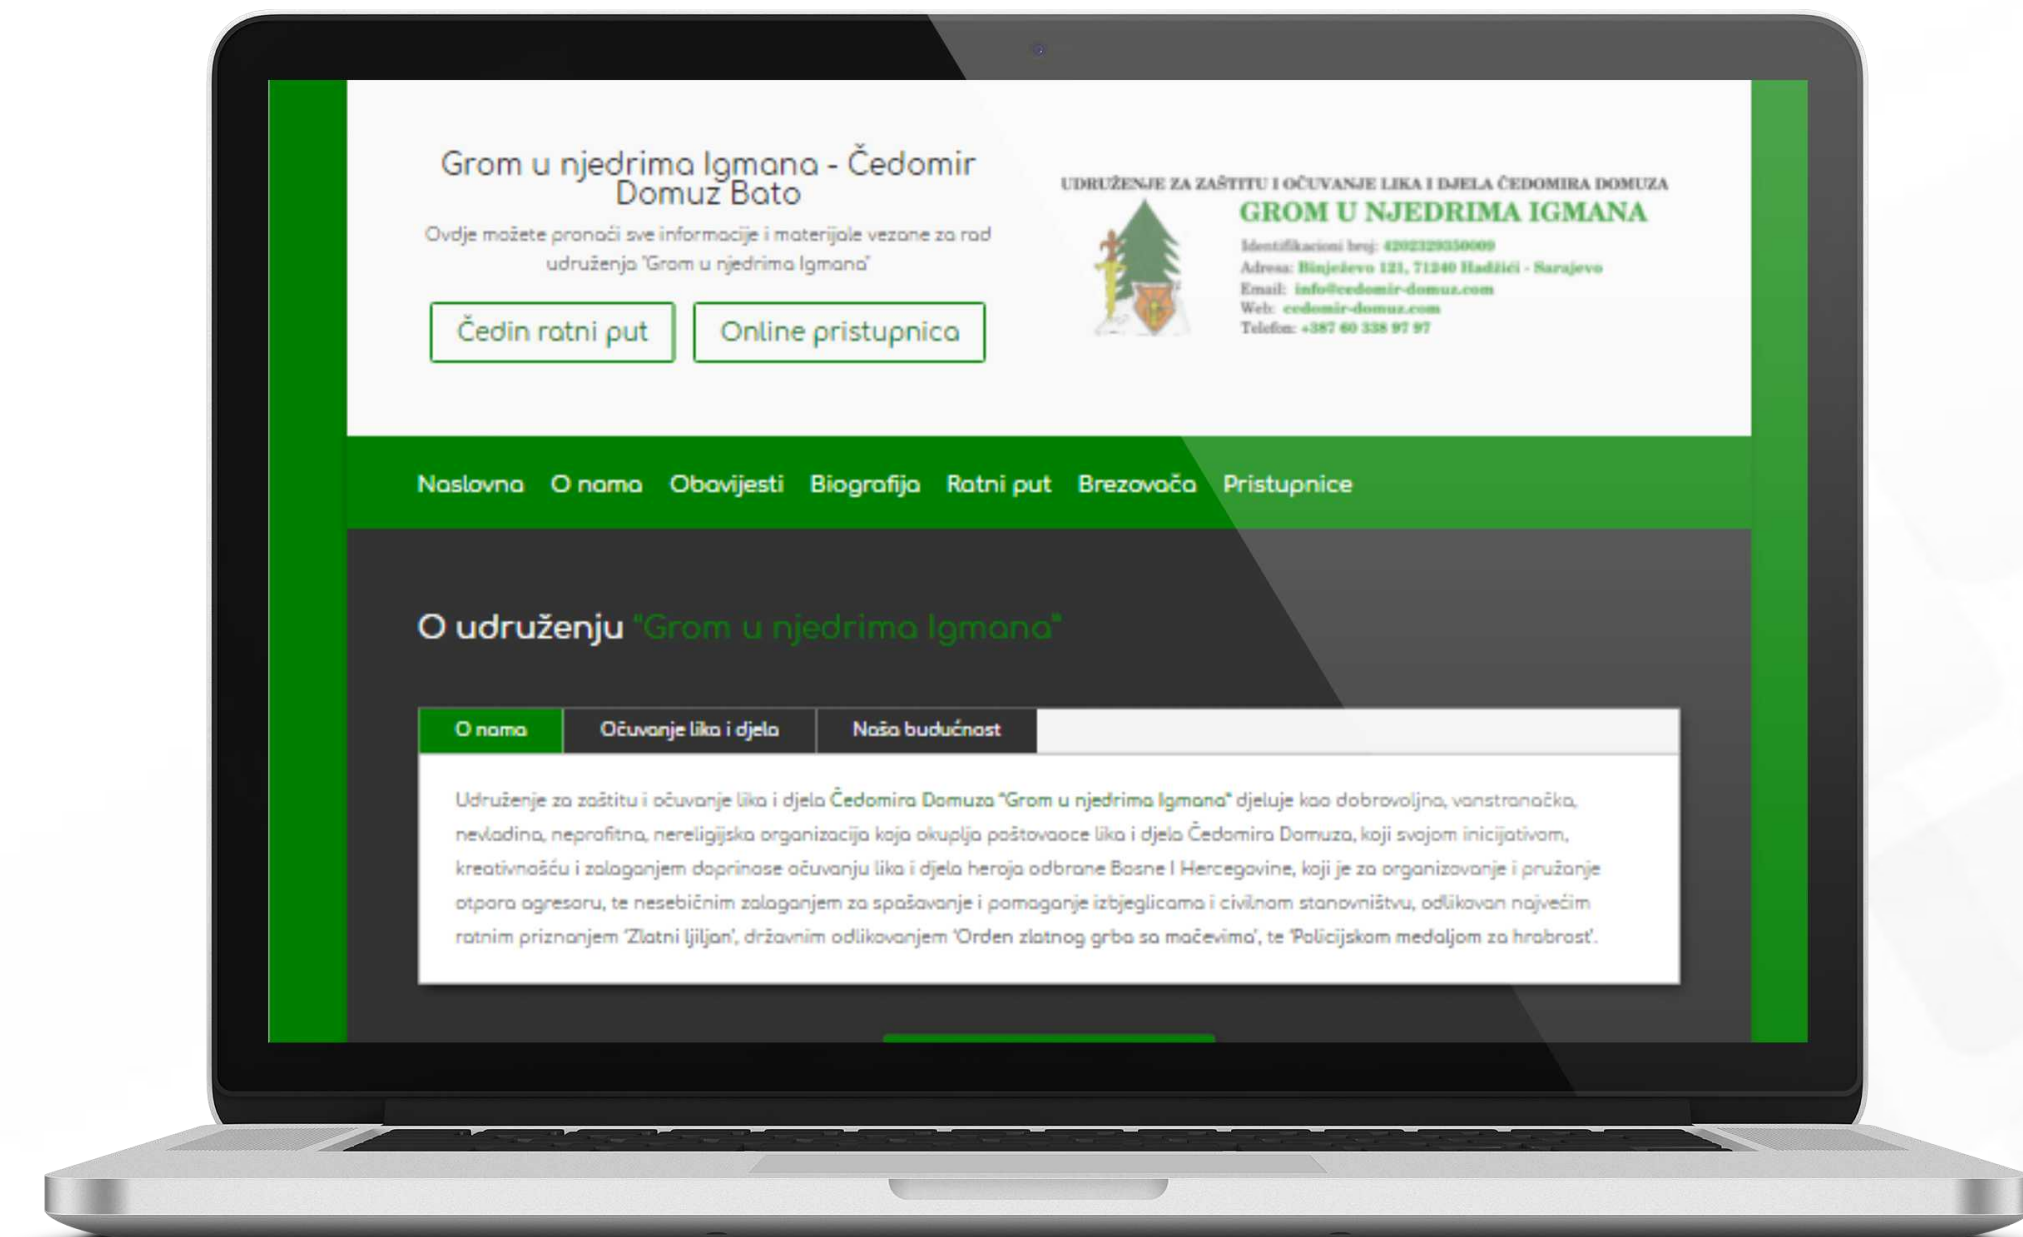

Udruženje Čedomir Domuz

For our clients, the Association for the Protection and Preservation of the Character and Works of Čedomir Domuz, we have created a modern and informative website to present the work of the association itself.

For the basic colors, we chose white, dark gray and green, and we chose a font that is clean and easy to read.

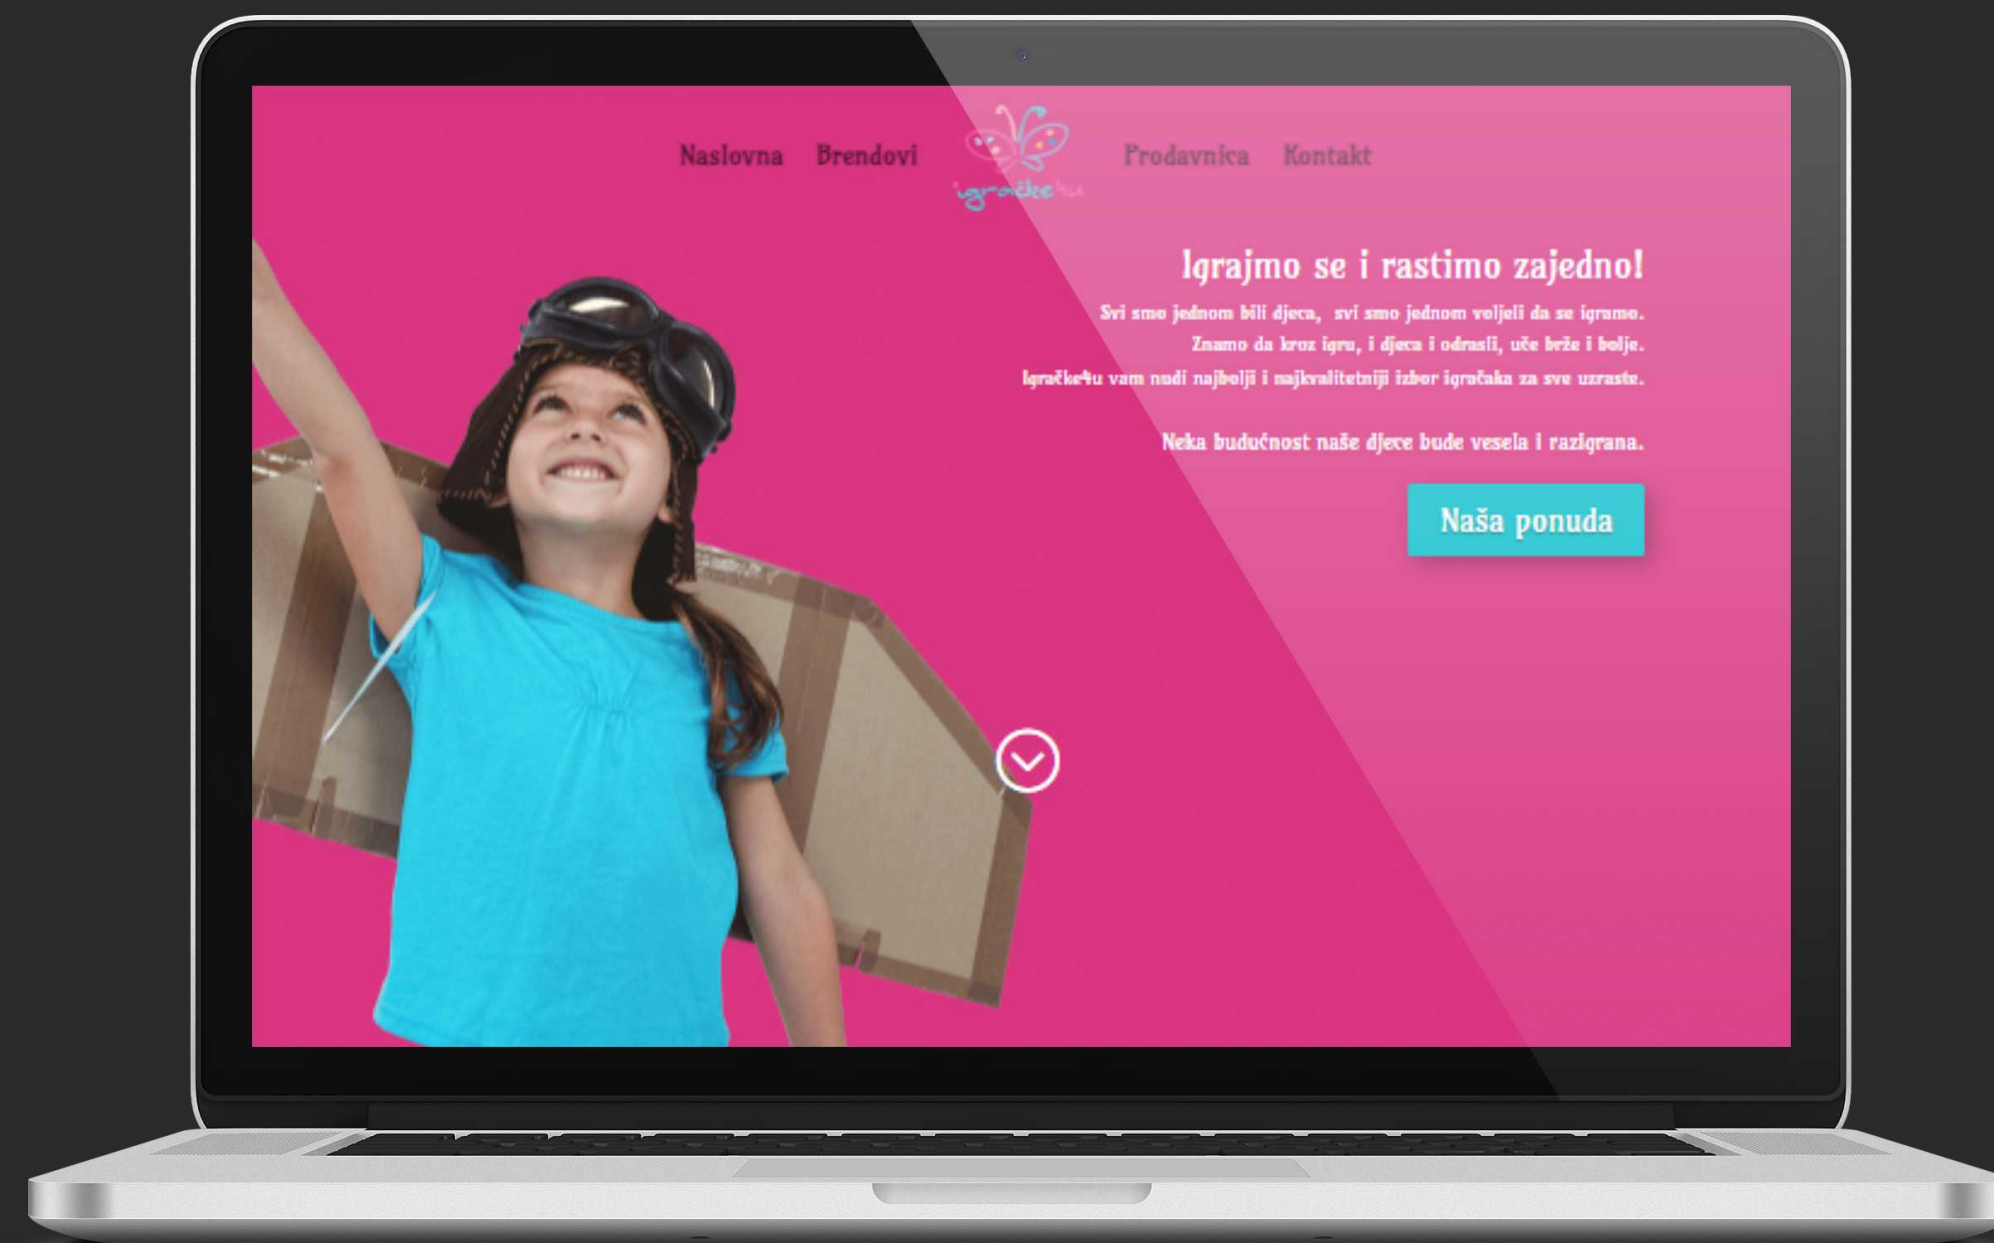

Within the website, we inserted and designed a lot of materials, and we also implemented the functionalities of online application forms with the management of all users who joined the association.

We also implemented the functionality of the contact form and added all other necessary information about the association.

cedomir-domuz.com

Igracke4U

igracke4u.com

We have created a modern and cheerful website for our clients to show all their products - toys.

For the basic colors, we took blue and pink, which we adapted to the logo itself.

Between sections for different content, we created special gradients of the background itself to make the transitions from one section to another invisible.

For selected product categories, we inserted the manufacturer's logos, while we colored the complete content of the website in white.

At the end of the page we have added all the necessary contact information together with the contact form.

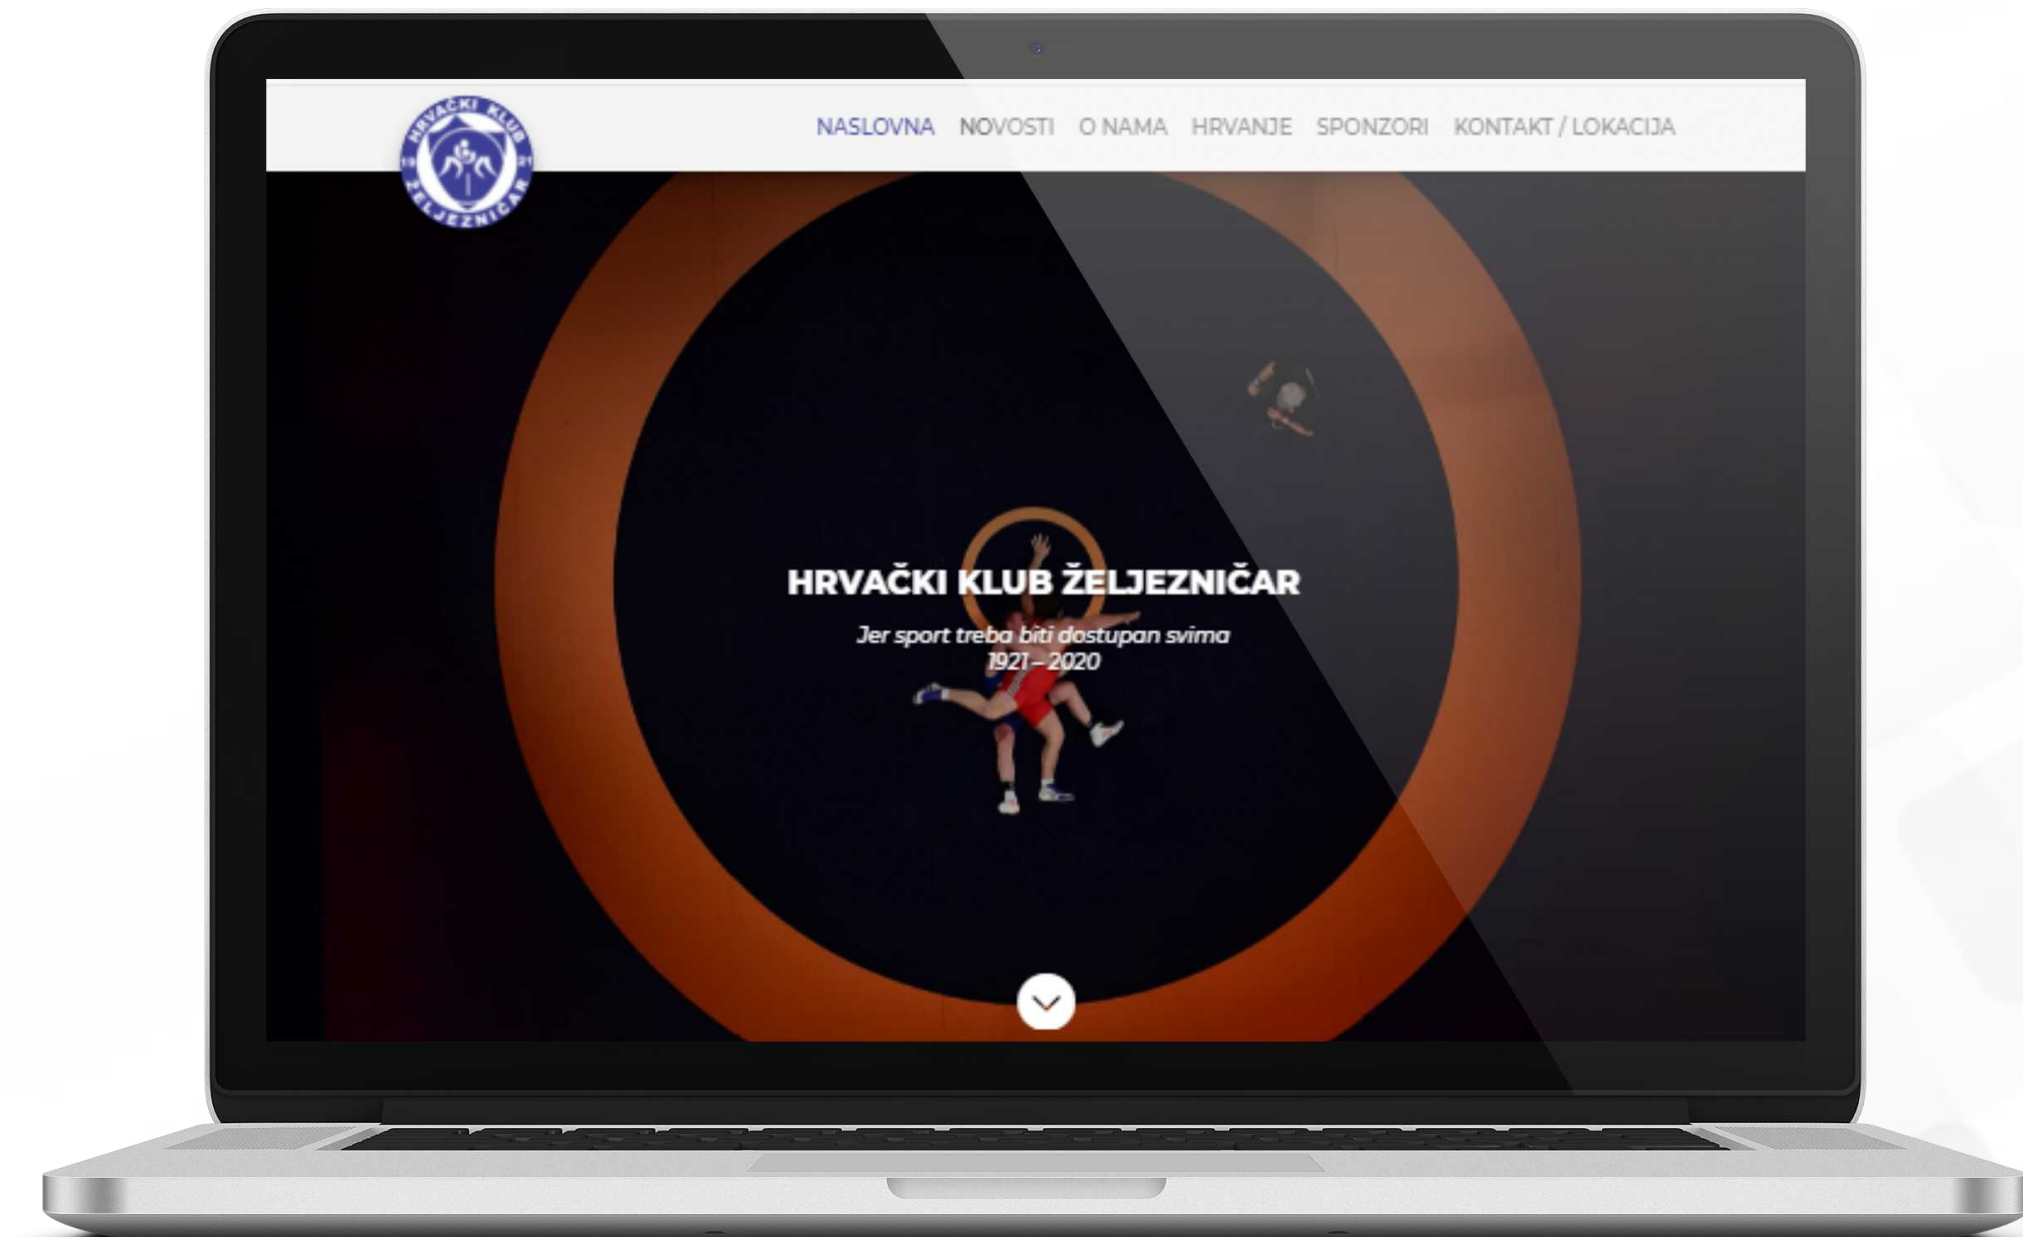

Hrvački klub Željezničar

For our client with a tradition of eighty years of existence, we have created a modern and dynamic website together with a blog.

For the basic colors, we took white and purple from the client's logo, and we used a modern font to make the complete content high quality and readable.

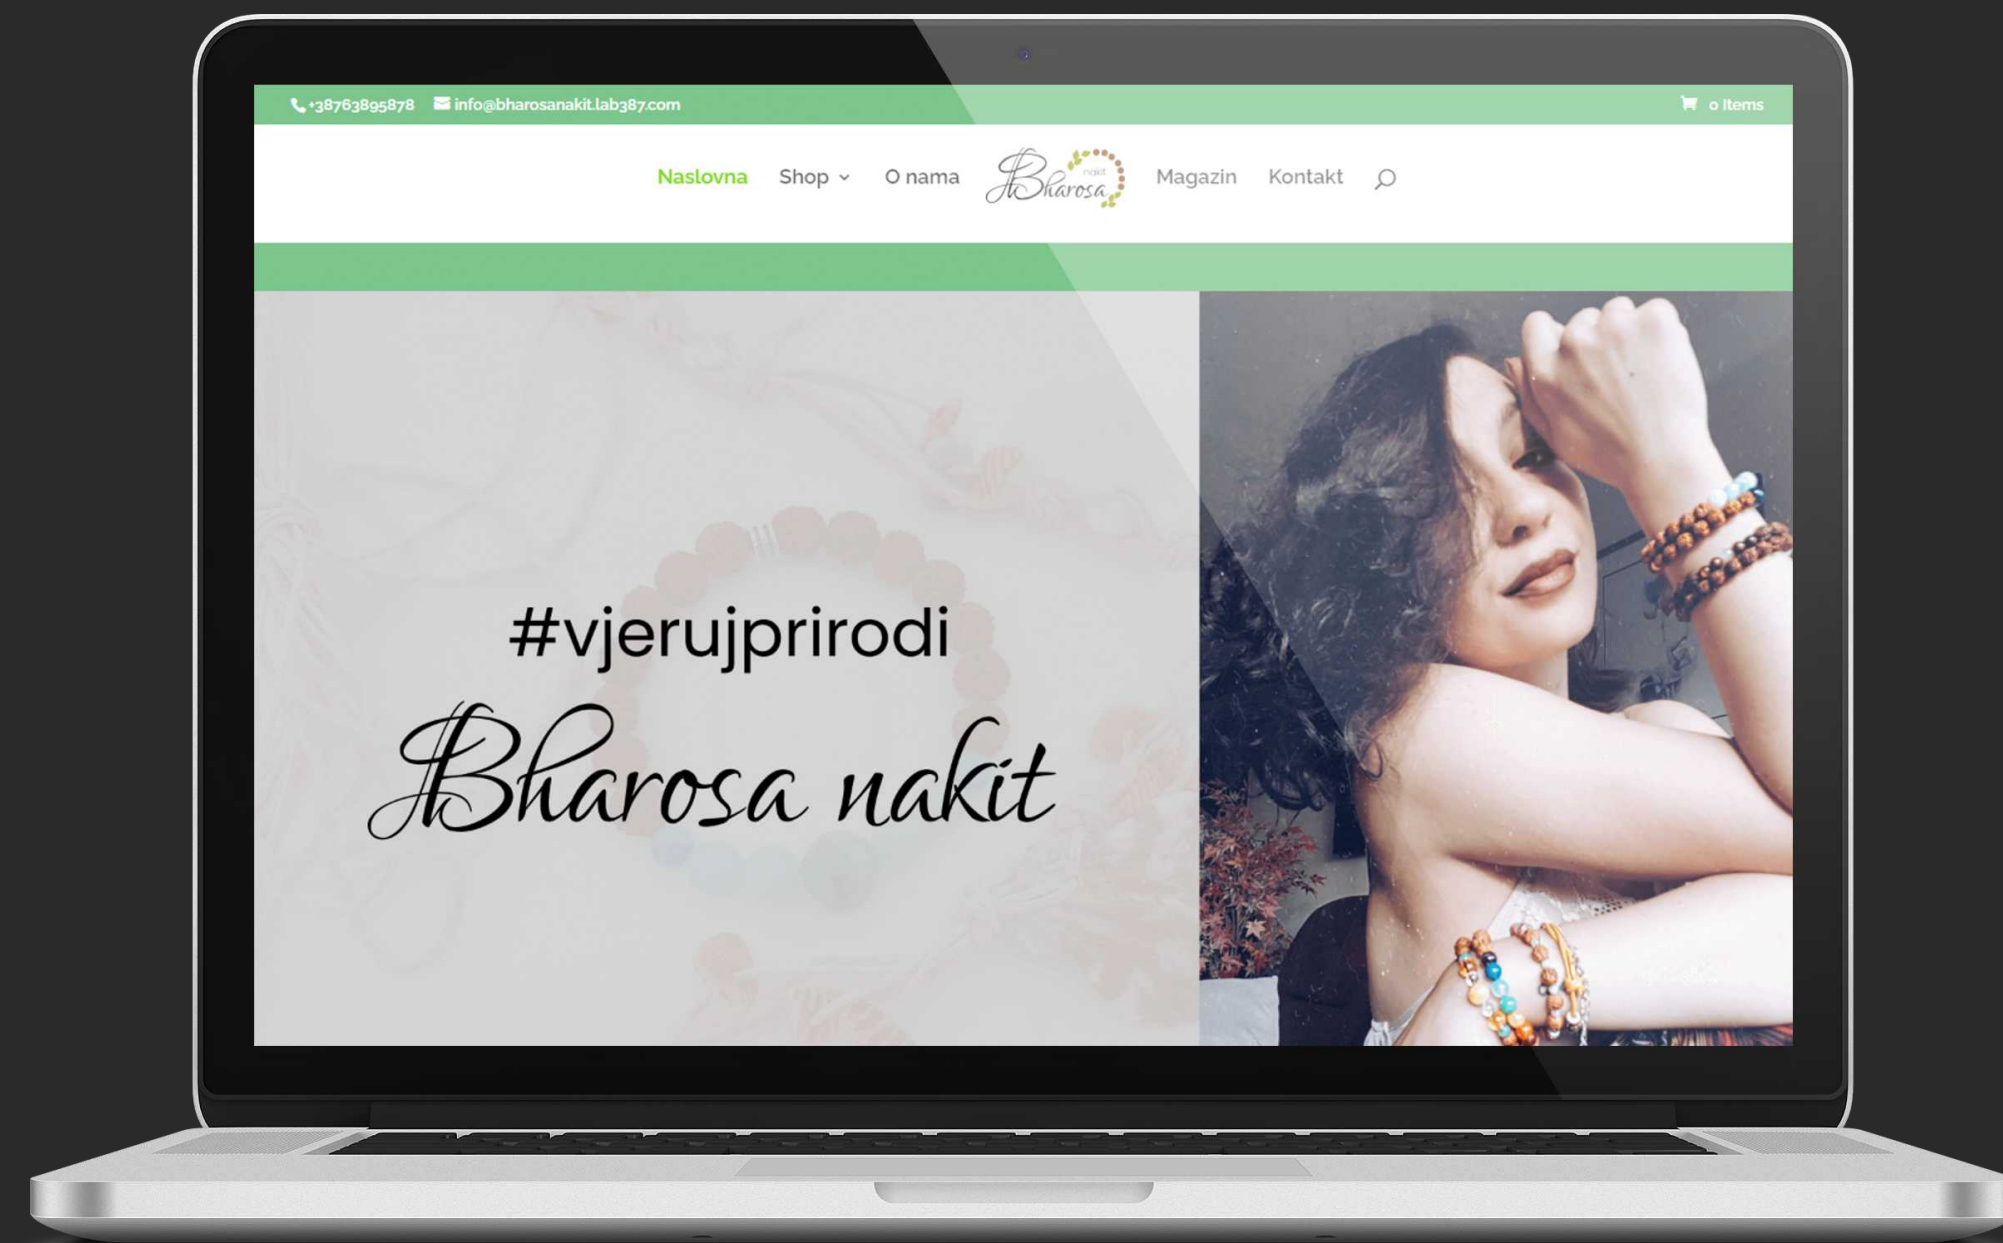

With simple animations and transitions as well as a quality structure, we have introduced a dose of modernity and gave space to all textual and photo content to come to the fore.

We have also implemented a contact form for the client and set up all important contact information.

hrvanje.ba

Bharosa Nakit

bharosanakit.lab387.com

For our client, we have created a modern and bold web shop for the sale of rudraksha jewelry - a special type of tree that grows in Southeast Asia and has a mystical and spiritual significance for many religious groups in the region.

We took white as the basic color, and we marked all the important places within the website with the color of nature - green.

The complete management of products, users and orders has been implemented on the site, and payment via PayPal has been implemented.

Also, a blog entitled Magazine has been implemented within the site so that the client can publish occasional articles related to her products.

Finally, we have integrated with the Mailchimp service to gather potential customers in one list, or send promotional emails.

Heroji dvadesete

For our clients, we created a modern and functional website that aimed to collect votes and award prizes to all heroes in 2020 - the most difficult period of the Covid-19 pandemic.

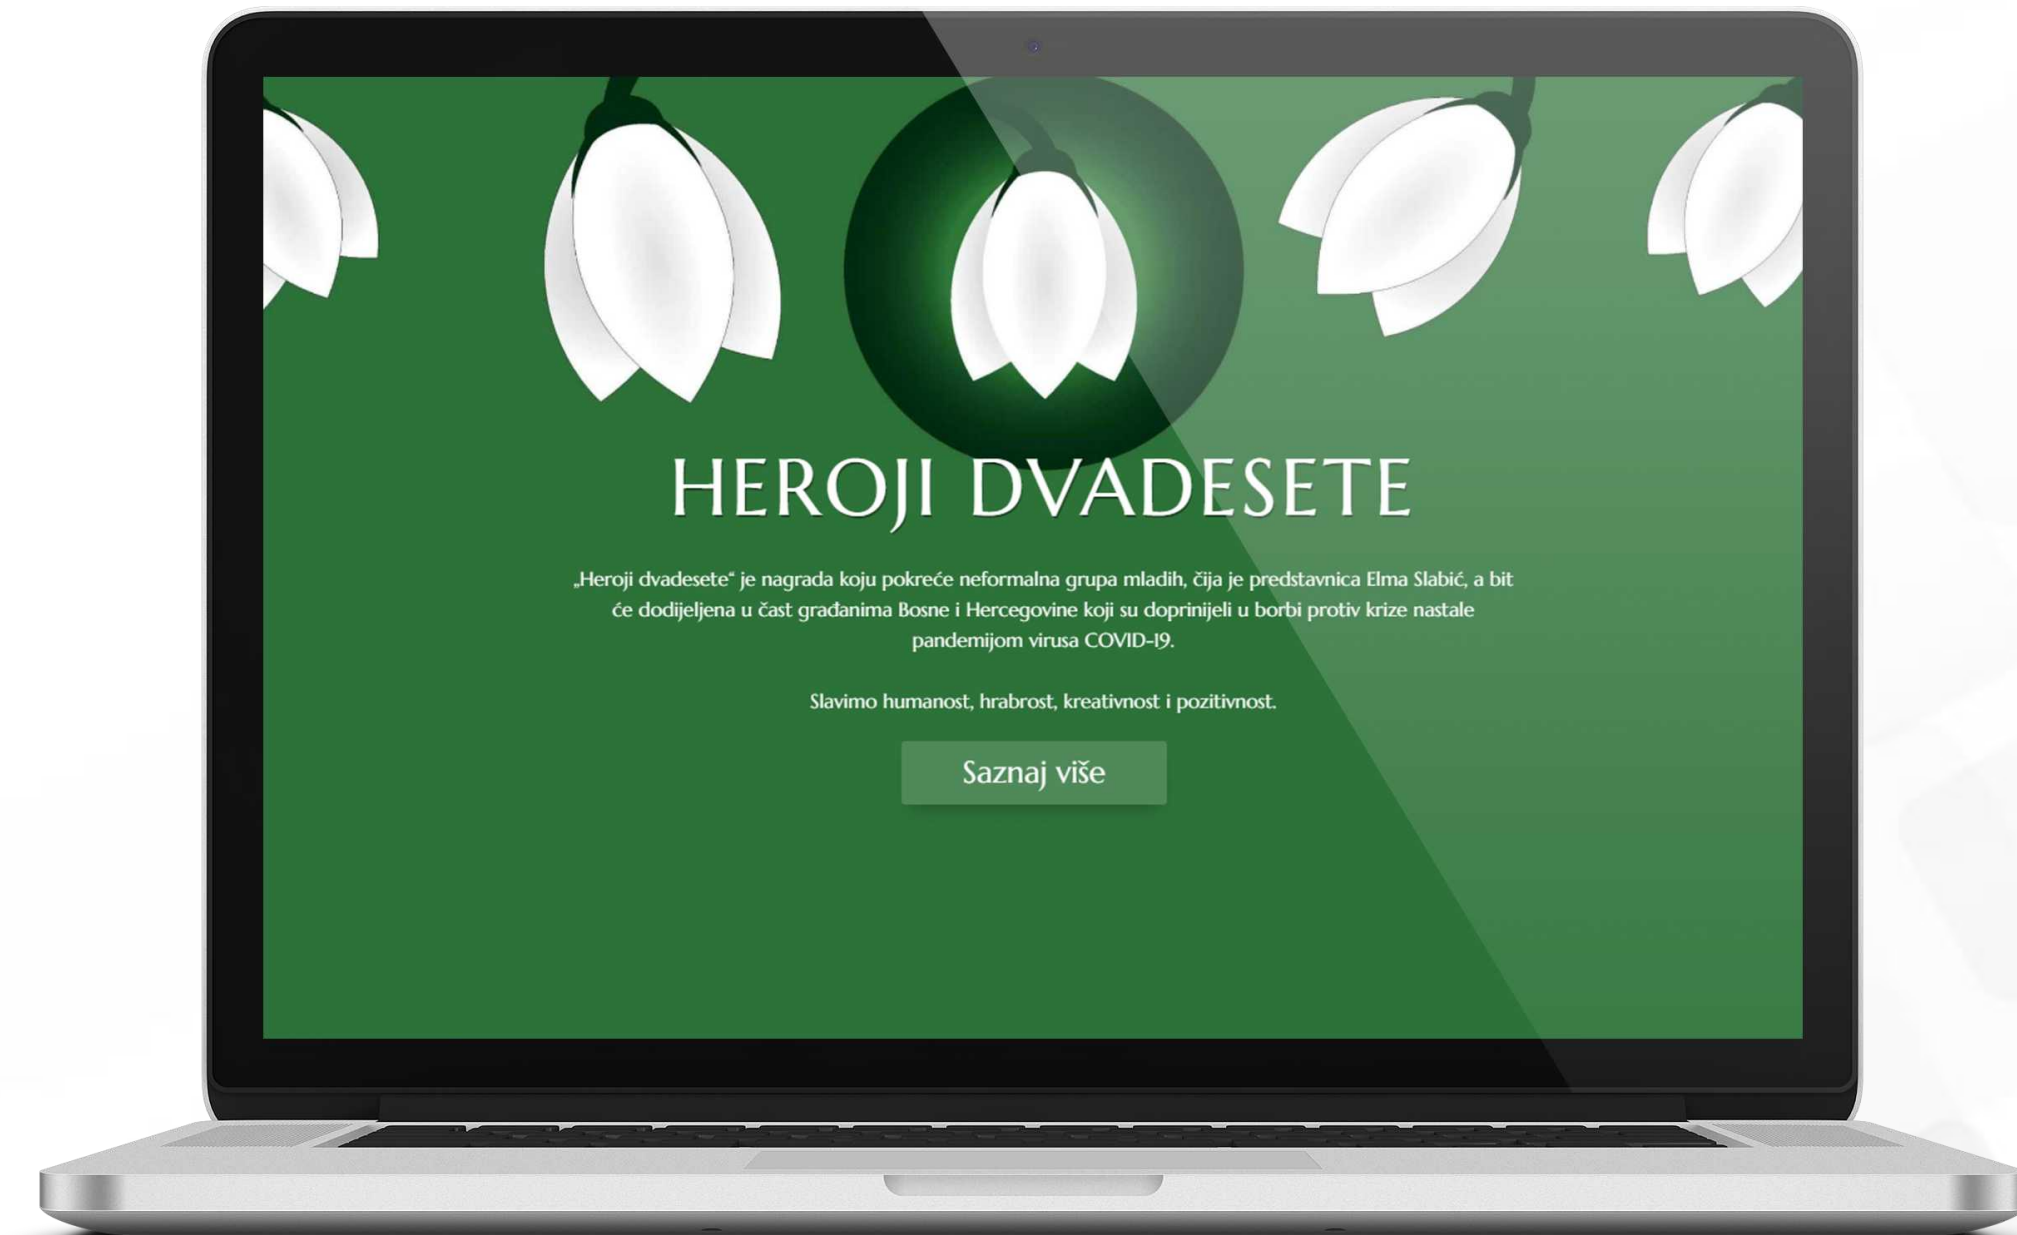

We took white as the basic color, while we marked all important places on the website with the appropriate green color. We implemented voting functionalities for the award candidates themselves, the time period for voting and insight into the number of votes collected and the winners themselves.

This is one of our most visited websites in 2020, which had over 100,000+ visits within a month.

This website was created within the ITAcademy Web Design Studio and is supported by several companies and media houses.

Team:

- Svetlana Saletović - PHP Developer
- Snežana Raonić - PHP Developer
- Biljana Mijić - PHP Developer
- Branko Nenadić - PHP Developer
- Amar Bešlija - Team Leader

herojidvadesete.lab387.com

Apartman Aranza

apartmanaranza.lab387.com

For our clients we have created a modern and dynamic website with the aim of presenting all the information about Apartment Aranza as well as online booking options.

We chose white for the basic colors, and we marked all important places on the website with blue and orange.

Within the site, we have implemented an interactive display of the apartment plan where each room contains its own photo, description and call to action, which opens by clicking on the room itself.

We have also implemented the functionality of the map with all interactive content in the vicinity of the apartment, contact form and the possibility of online booking.

Online reservations have the option of apartment occupancy management, interactive calendar, overview of all reservations and management of each individual reservation with automated sending of email notifications.

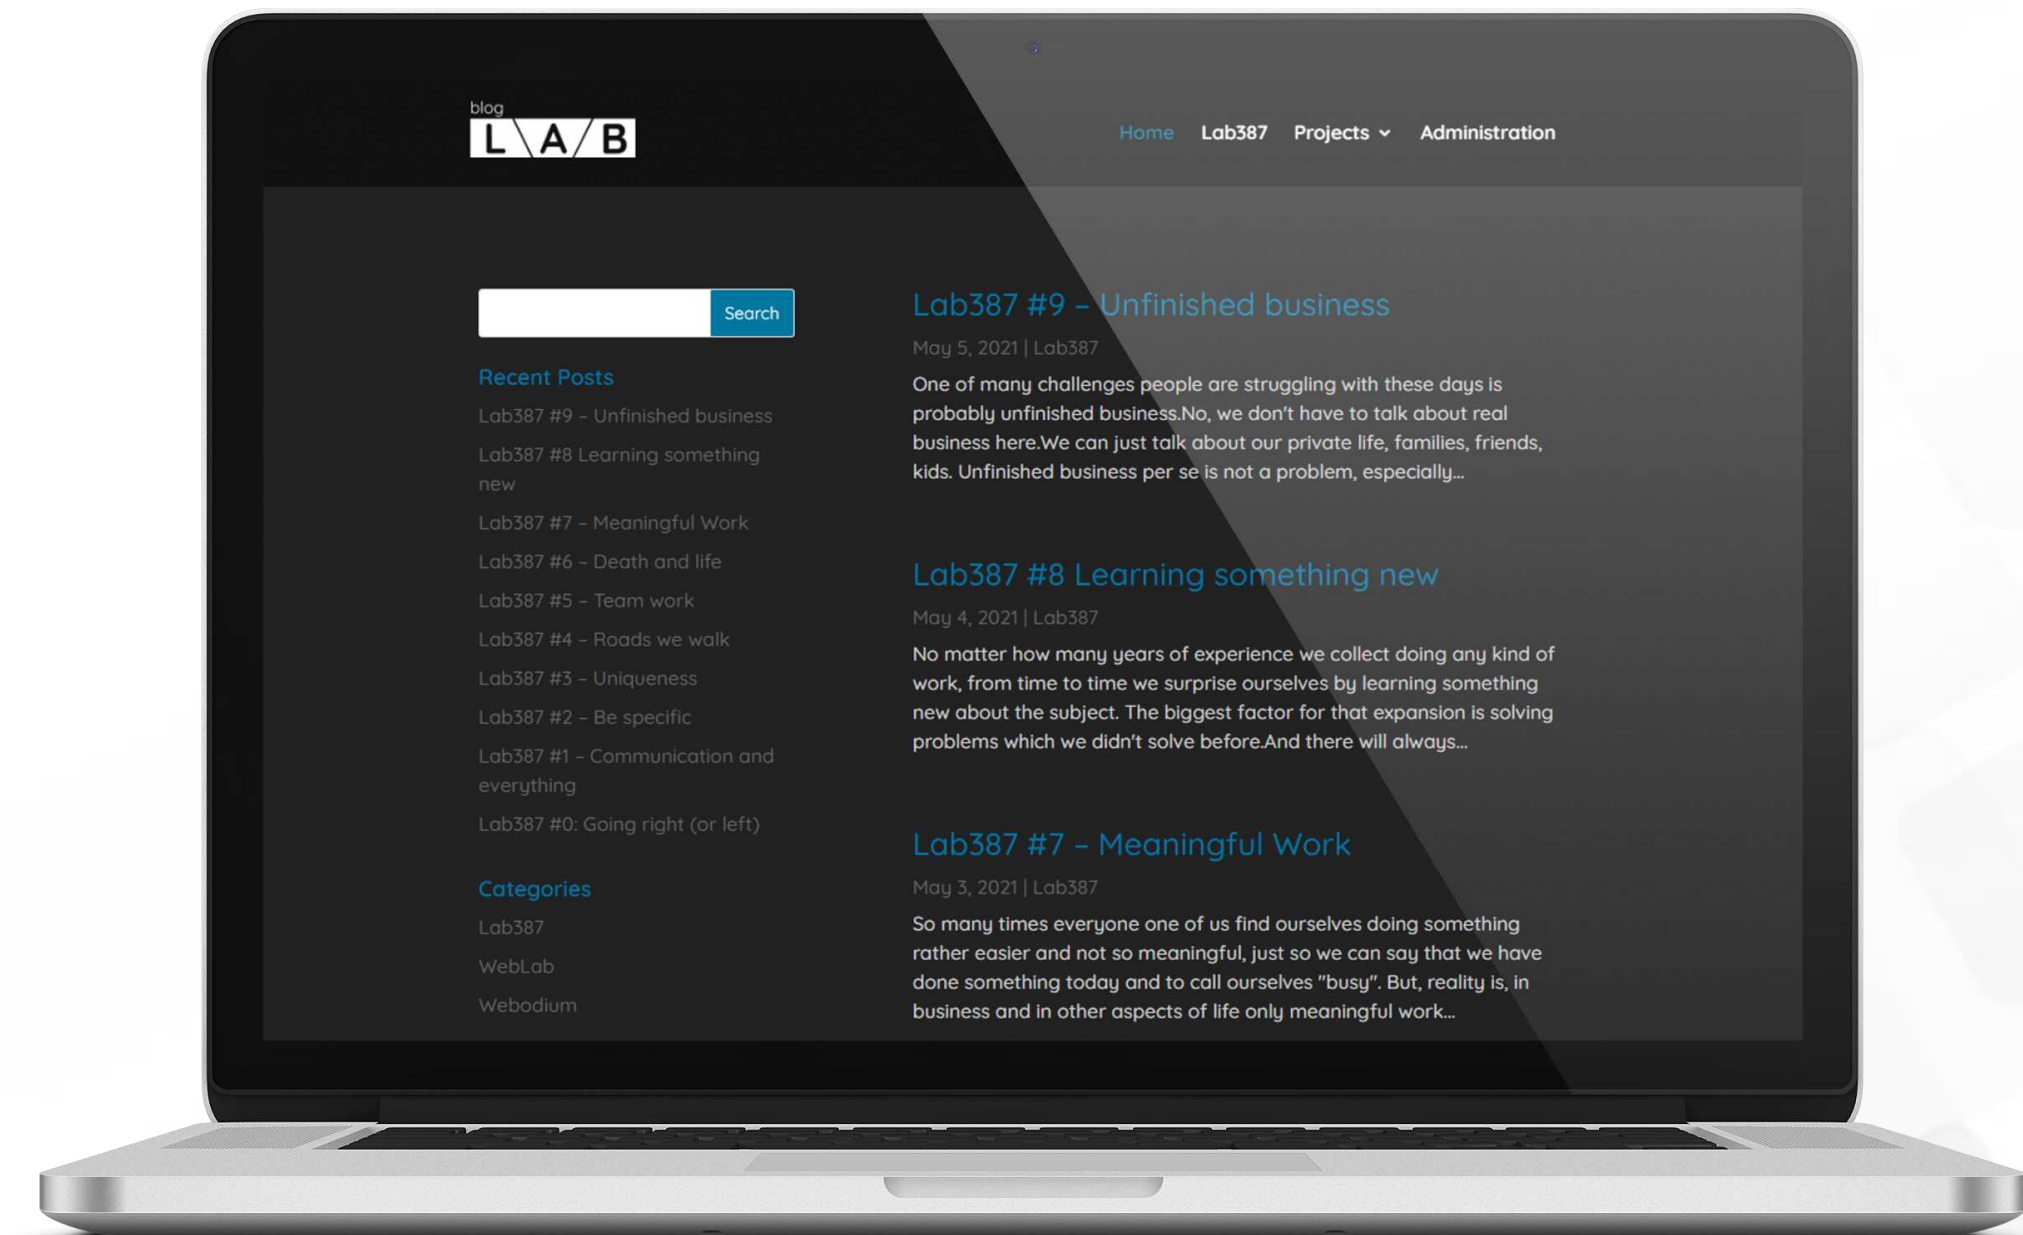

Lab387 Blog

For our company, we have created a modern and simple blog to display various interesting posts related to all areas of work of the Lab387 company.

Through links within the menu, we linked the Lab387 blog to the main website to allow more visits to it.

We have implemented the ability to search for the complete blog, share posts via a large number of social networks, display the latest posts as well as the categories in which there are blog posts.

For the basic colors, we took dark gray, black and white, and we adjusted the font to the main font of the company Lab387.

blog.lab387.com

Izgradi dom

izgradidom.lab387.com

"Build a home" is our first website created by our CEO back in 2016, at the very beginning of learning and working.

Although it is outdated by all modern standards and does not have the best user experience, it still represents our beginning, so we posted it in its original condition.

With it, we want to remind our clients and ourselves that growth and development is always our primary goal, looking at all other websites and web applications within our portfolio.

If you want to see the modern edition of this website, visit izgradidom.com and see where we are today.

Contact

If you came to this place, it means that you have reviewed our complete portfolio! Thank you for taking the time to look at our contributions in the areas of web, design and education.

If you liked what we do and how we do it, feel free to contact us so that we can help you solve your problems and become part of our family.
